Clarification Questions — Store Analytics (Reports Tab)

Sources: TS-Store Analytics (Reports Tab)-161026-094501.pdf (primary); cross-checked against TS-Store Settings (Settings Tab), TS-Store Status & Lifecycle, TS-Order Management (Orders Tab), TS-Store Home (Home Tab), TS-Roster Management (My Team(s) Tab), TS-Launch & Status Controls, TS-Customize New Product · Total: 24 (P1 6 · P2 12 · P3 6)

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-1	P1	Conflict	What exactly decides whether the Team Fundraising Report renders? Epic A allows an item to have fundraising on while the store flag is off; Settings says that state cannot exist, and Epic D / Dependencies use a three-state read instead.	[OI-1] Analytics Epic A: "present only when team fundraising is enabled at the store level, or when any individual item within the store has fundraising enabled" vs Analytics Dependencies: "three-state resolution … The report renders in the first and third states and is hidden only in the second" vs Settings Epic A4: "A per-item toggle can always narrow, never widen … A rep cannot enable fundraising on one item in a store where fundraising is off"	A) Use the Settings A4 three-state read only (Enabled, Disabled-with-exemptions render; Disabled-nothing-collecting hides) and delete the Epic A "any individual item" wording (recommended). B) Keep Epic A wording and change Settings to allow item-level widening.	The render gate is built on the wrong predicate; the report shows or hides in the wrong stores, and Home C-23 / Settings pill disagree with the Reports tab.
Q-2	P1	Conflict	Does the Reports tab host the Store Close Report entry point and report UI? The Analytics spec lists exactly three components; Store Status & Lifecycle and Home say the Close Report lives on the Reports tab.	[OI-10] Analytics Epic A: "The page stacks three components, in order: KPI summary row … Team Revenue chart … Team Fundraising Report" vs Store Status & Lifecycle, Store Close Report: "A Store Close Report entry sits at the top of the Reports tab … The Reports tab owns the on-demand entry point and the report UI itself" vs Home C-17: "Reports → Store Close Report" vs Settings Epic H: "it remains reachable from the Store Status card in Schedule & Status"	A) Add a fourth component (Close Report entry, disabled with "Available when the store closes" in Draft/Open) at the top of the Reports tab, and the Analytics spec owns the report UI (recommended, matches two specs). B) Close Report lives only in Settings → Schedule & Status; Store Status & Lifecycle and Home C-17 are amended.	No team owns the Close Report UI, or it is built twice; page layout and Home deep link are wrong.

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-3	P1	Gap	What time period does each KPI card value cover, and how is the trend computed?	[OI-3, OI-4] Analytics Epic B: "each showing a value and a trend vs. last month" · "Card 1 · Total Revenue — total dollar amount (e.g. $3,810)" vs Store Status & Lifecycle, Close Report: "the vs.-last-period trend delta the KPI cards already use"	Value: A) all-time for the store, B) current order window, C) current calendar month, D) follows the Fundraising date-range picker. Trend: calendar month vs previous calendar month (recommended) or trailing 30 vs prior 30 days. Also state: time zone used, and display when last month is 0 (e.g. "—" or "New").	Aggregation queries cannot be written; figures will not reconcile with the Close Report "as of [close date]" values.
Q-4	P1	Ambiguous	What does the Orders card count, and does it match the All Orders list it links to?	[OI-5, OI-9] Analytics Epic B: "Card 2 · Orders — total volume count of closed sales (e.g. 83) … jumps to the Orders tab's All Orders view" vs Order Management Epic A: "All Orders … consolidating the rep's own orders and fan orders into one view … Pending orders appear only in the Pending sub-tab" vs Order Management Problem: "rep-placed orders, individual player orders … and fan orders" vs Home Epic E: "order counts follow the Orders tab's"	Define "closed sale": A) every non-pending, non-cancelled order (submitted onward), all three origins (recommended). B) delivered orders only. C) every order incl. pending. Confirm whether player orders appear in All Orders, and whether cancelled/refunded orders are excluded.	Card count and the All Orders row count differ on click-through; Home rail and Close Report counts drift.
Q-5	P1	Gap	What money is in "revenue" for Total Revenue and the Team Revenue series, and how are refunds and cancellations handled?	[OI-6] Analytics Epic C: "Team revenue resolves to gross buyer spend on orders attributable to the team … the full buyer-paid amount" vs Store Status & Lifecycle, Close Report: "Refunds and cancellations net out of revenue consistently with the Reports tab, and the netting is stated on the report"	Confirm in/out for: sales tax, shipping, fundraising markup, Minimum Quantity Fee, discounts, $0 team-supplied items. Refunds: A) net out (matches Close Report, recommended). B) gross, not netted. Also confirm Total Revenue KPI equals the sum of the Team Revenue series for the same period.	Two revenue numbers on the same page disagree; the Close Report cannot reconcile with the Reports tab as required.

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-6	P1	Gap	How are Platform Fees and Card Processing Fees calculated and allocated to the fundraising portion of an order?	[OI-7] Analytics Epic D: "a line-item table lists Fundraising Collected, Platform Fees, Card Processing Fees, and the bolded Net Fundraising total" · Dependencies: "platform-fee and card-processing-fee calculations to derive net fundraising"	Provide: fee rates or source service, whether card fees are pro-rated to the fundraising share of each order (recommended) or charged in full, whether fees are reversed on refund, and rounding rules.	Net Fundraising cannot be computed; the figure the team is told it earned may be wrong.
Q-7	P2	Conflict	Does the Pending Orders card count the same orders as the Orders tab's Pending sub-tab?	[OI-5, OI-9] Analytics Epic B: "Card 3 · Pending Orders — count of active orders currently processing … jumps to the Orders tab's Pending Orders sub-tab" vs Order Management Epic A: "Pending Orders: … orders that have been placed in the storefront but not yet approved by the rep and sent to the factory" vs Home C-01 trigger: "≥1 order in the storefront → pending state, not yet submitted to the factory"	A) Card = Pending sub-tab live count badge (not-yet-submitted orders) and copy changes from "currently processing" (recommended). B) Card counts submitted orders in production, and the deep link target changes.	Card number does not match the badge it opens; Home C-01 and the Reports tab disagree.
Q-8	P2	Ambiguous	Is Average Order Value per order or per session, and what numerator and denominator are used?	[OI-5] Analytics Epic B: "Card 4 · Avg. Order Value — average amount spent per order/session (e.g. $46)"	A) Total Revenue ÷ Orders card count, same period and same inclusions (recommended). B) Per checkout session. Confirm whether $0 team-supplied orders are excluded.	AOV is not reproducible and will not match the Close Report AOV.
Q-9	P2	Gap	What is the Team Revenue chart's time axis, and does it get the Day / Month / Year toggle and current-period bar?	[OI-2, OI-3] Analytics Epic A: "OPEN — to be confirmed: whether the Team Revenue chart carries a Day / Month / Year granularity toggle and a highlighted current-period bar" · Epic C: "re-purposed to map team revenue over time"	A) Adopt the Overview pattern: Day / Month / Year toggle, default Month, current period highlighted (recommended). B) Fixed monthly bars. Also confirm the default range (order window vs last 12 months), date basis (order placed vs paid), and whether the chart follows the Fundraising date-range picker.	Chart cannot be built; scope of the standalone component is unknown.

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-10	P2	Conflict	Should the Store Close Report still show a "Team Profit" chart and trend?	[OI-11] Store Status & Lifecycle, Close Report detail layer: "Plus the Team Profit chart for the window" · Exports: "the hero figures, and the Team Profit trend" vs Analytics Epic C: "Renamed from the Team Profit chart, September 1, 2026 … Any copy, axis label, tooltip, or export header describing it as profit or margin must be updated" vs Settings Epic H: "it now reports team revenue and fundraising, matching the Reports tab"	A) Replace with the Team Revenue (League Revenue) chart and trend everywhere in the Close Report (recommended). B) Keep a profit chart with a new data source (none exists).	Close Report renders a chart with no data source, or shows margin under a revenue label.
Q-11	P2	Gap	How is an order attributed to a team or division for Team / League Revenue?	[OI-6] Analytics Epic C: "gross buyer spend on orders attributable to all teams and divisions within the league … filter … to a specific team or division" · Dependencies: "requires the order→team and team→division joins" vs Roster Management Epic 0: "Deleting a division keeps its teams — they become standalone teams" · Epic 7: "each player leaves the origin roster and joins the destination roster" · Dependencies: team codes "stamped onto orders for container routing and reporting"	A) Attribute by the team code stamped on the order at purchase; division by the team's current division (recommended). B) Attribute by the player's current team. Also: where do fan and rep orders with no team selection go (an "Unassigned" bucket?), and how are orders for deleted teams shown?	League filter totals do not add up to the league total; history shifts when structure changes.
Q-12	P2	Ambiguous	Does the League Revenue team/division filter scope only the chart, or also the KPI cards and the Fundraising Report? Is it single- or multi-select?	Analytics Epic C: "It additionally carries a filter control allowing the rep to narrow the revenue shown to a specific team or division within the league" · Epic A: "Every figure on it is scoped to the currently-viewed store"	A) Chart only, single-select with "All teams" default (recommended). B) Page-wide filter applying to KPIs and Fundraising Report. Also confirm whether the Fundraising Report gets a per-team breakdown in league stores.	Rep reads league-wide KPIs next to a filtered chart, or the filter is built for the wrong scope.

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-13	P2	Conflict	Should the Close Report keep the fundraising figures when Team Fundraising is off but items are still collecting?	[OI-12] Store Status & Lifecycle, Close Report: "Net Fundraising (only when Team Fundraising is enabled; Avg. Order Value is promoted into this slot when it is disabled)" · Edge cases: "Team Fundraising disabled — The Net Fundraising hero figure and the fundraising breakdown are omitted entirely" vs Analytics Epic D: "The report renders when Team Fundraising is enabled … or when the store has any item still collecting fundraising despite a store-level disable"	A) Close Report uses the same three-state read as the Reports tab: show fundraising in Enabled and Disabled-with-exemptions (recommended). B) Close Report uses the boolean store flag only.	Close Report hides money that the Reports tab shows, breaking the "figures reconcile" rule.
Q-14	P2	Gap	On what date is fundraising counted, and what happens to it when an order is cancelled, refunded or left with an open PO?	[OI-7] Analytics Epic D: "figures are a record of what was collected, never recalculated against current settings" · Dependencies: "fundraising-flagged price-addition line items aggregated per order and date range" vs Settings Epic A4: "If every order against an exempted item is later cancelled, its commercial lock releases" vs Home C-20: "≥1 order in the window with an open PO"	Date basis: A) order placed date (recommended), B) payment date, C) factory submission date. Cancellation/refund: A) reverse the fundraising line (recommended), B) keep as collected. Open PO: count as collected or pending?	"Collected" is overstated; date-range totals change depending on interpretation.

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-15	P2	Ambiguous	How do the date-range presets resolve, and what is the default?	[OI-8, OI-15] Analytics Epic D: "presets — This season (the store's open window), Last 7 days, Last 30 days, Year to date" vs Settings Epic E: "always-on stores show an 'Always open' pill" · "schedule at store level or per team code" · "repeating close cadence" vs Store Status & Lifecycle: "A store that is re-opened and later closed again produces a new close event with a new report scoped to the new window"	Confirm: default preset (This season recommended); "This season" for always-on stores (launch date to today?); after a re-open (current window only or all windows?); with per-team-code windows (earliest open to latest close?); whether "Year to date" is calendar year; whether a custom range is allowed; time zone.	Preset filters return different totals than the Close Report for the same window; always-on stores have no defined default.
Q-16	P2	Conflict	Is the summary sentence under the breakdown scoped to the selected date range or to all orders ever?	[OI-8] Analytics Epic D: "followed by an analytical sentence summarizing collected → fees → net across all orders to-date" vs Epic D: "a range control with presets … that scope the figures"	A) Sentence uses the selected date range, same as the table (recommended). B) Sentence always uses all-time totals and is labelled as such.	Table and sentence show different numbers on the same card.
Q-17	P2	Ambiguous	What do the Fundraising Report Settings modal options produce in the PDF?	[OI-14] Analytics Epic D: "a summary-mode radio (Net Fundraising Summary, default, vs. Gross Total Summary) plus report-detail checkboxes (Detailed Breakdown, Selected Date Range, Include PDF Report Notes)"	Define: what "Gross Total Summary" shows (Fundraising Collected before fees, or gross store revenue?); where report notes are entered and their length limit; what date range applies when "Selected Date Range" is unchecked (all-time?); checkbox defaults; file name, branding and whether the league filter applies.	PDF content is guessed; the Close Report export, which "follows the existing Fundraising Report Download PDF pattern", inherits the guess.

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-18	P2	Gap	Who can see the Reports tab and which parts of it, including team managers in the portal and archived stores?	[OI-13, OI-15] Settings Epic A2b: "the invitee lands in a slimmed-down portal with exactly two areas — Reporting and Rosters" · Settings Epic H: manager version "excludes dealer profit and any figure outside that manager's scope" vs Store Status & Lifecycle: "Team-manager role: full parity with the rep for this report" · Archived: "Viewable read-only; exports still available" · Analytics Persona: "The store manager (rep)"	A) Portal "Reporting" = this Reports tab scoped to the manager's team, with KPI, chart and Fundraising Report, PDF export allowed (recommended). B) Portal Reporting is a separate, smaller surface. Also confirm: non-owner reps' access, and Reports tab plus Download PDF stay available read-only on Archived stores.	Access control is undefined; a manager may see league-wide or other teams' figures, or be blocked from data they were invited to see.
Q-19	P3	Ambiguous	Is the Reports tab a per-store version of the Overview dashboard or a separate page? The story and Epic A say opposite things.	Analytics User story: "As a rep, I want a per-store version of the Overview dashboard" vs Epic A: "a store-scoped analytics page in its own right, not a per-store rendering of the workspace Overview dashboard" · Component ownership: "The four KPI summary cards reuse the Overview dashboard's KPI card components"	Confirm: KPI cards share the Overview components (and follow future changes); chart and Fundraising Report are independent and do not (recommended, matches "Component ownership"). Reword the user story.	Low; risk that a later Overview change is wrongly propagated or wrongly withheld.
Q-20	P3	Gap	What do the KPI cards, chart and Fundraising Report show when there is no data?	[OI-15] Analytics Epic B: "each showing a value and a trend vs. last month" · Epic C: "map team revenue over time" (no empty state specified) vs Store Status & Lifecycle edge cases: "Zero orders in the window — Superlatives and celebratory framing are suppressed"	Specify: Draft store with zero orders (show $0 / 0 with "No orders yet"?), trend when the prior month is zero, empty chart state, Fundraising Report with no line items in range.	Inconsistent or broken-looking zero states.

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-21	P3	Ambiguous	When can an item's fundraising be switched off while it has historical contributions, given the commercial lock?	Analytics Epic D: "An item with fundraising switched off contributes nothing from that point forward but its historical contributions remain in the totals" vs Settings Epic A4: "An item carrying a non-cancelled order has its fundraising toggle locked"	A) Only after all its orders are cancelled (then there are no contributions to keep). B) The lock lifts at window close / re-open, so an item can be switched off for the next window and keeps prior totals. Confirm which.	Low; affects test cases for "never recalculated" behaviour.
Q-22	P3	Gap	What is the exact copy for the mixed-state banner and the scope-note banner?	Analytics Epic D: "it carries a banner stating that fundraising has been disabled for the store and that the figures below cover items that were already ordered" · "a banner clarifies the report only includes price additions marked as 'Fundraising'"	Provide final copy, and confirm both banners can show together. Suggested: "Fundraising is off for this store. Figures below include items that were already ordered and are still collecting."	Copy invented at build time; may contradict Settings A4 card wording.
Q-23	P3	Ambiguous	Which documents are "Product Catalog Management, Governing rule 3" and "Store General Settings, Epic A4"? Neither is in the input set under that name.	Analytics Dependencies: "matching the three-state read specified in Product Catalog Management, Governing rule 3, and surfaced on the Settings card in Store General Settings, Epic A4" vs input file "TS-Store Settings (Settings Tab)"	Confirm "Store General Settings" = "Store Settings (Settings Tab)" and supply the Products Tab spec (per-item fundraising toggle rules).	Per-item fundraising rules that drive the report cannot be verified.
Q-24	P3	Ambiguous	Is the Active Order Window card's "Total raised" the same figure as the Reports tab's Total Revenue (for the window) or Fundraising Collected?	Settings Epic E: "Total raised: the card shows the total $ amount raised during the window" · Dependencies: "an aggregate of order revenue raised during the window" vs Home Epic E: "fundraising is a per-item markup … the Active Order Window card reports total raised" · Analytics Epic C: "fundraising collected is a distinct figure"	A) "Total raised" = Total Revenue for the window and is relabelled "Revenue this window" (recommended). B) It is Fundraising Collected and must read from the Fundraising Report source.	Reps see a "raised" number that matches neither Reports figure.
