Clarification Questions — Team Stores: Store Workspace (all tabs, lifecycle, launch, customize)

Sources: TS-Store Status & Lifecycle-161026-094525.pdf (Lifecycle), TS-Launch & Status Controls-161026-094523.pdf (Launch), TS-Store Home (Home Tab)-161026-011919.pdf (Home), TS-Store Settings (Settings Tab)-161026-094514.pdf (Settings), TS-Order Management (Orders Tab)-161026-094455.pdf (Orders), TS-Roster Management (My Team(s) Tab)-161026-092450.pdf (Roster), TS-Store Analytics (Reports Tab)-161026-094501.pdf (Reports), TS-Customize New Product-161026-094448.pdf (Customize) · Total: 58 (P1 7 · P2 34 · P3 17)

Every summary open item OI-1 to OI-46 appears in the Source column of at least one question. Rows marked "consolidator finding" are cross-document issues that the summary did not raise.

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-1	P1	Conflict	Is the launch gate "at least one product added" (any product, visible or hidden) or "at least one visible product"?	OI-13. Launch §Gate: "the gate is products added, not published; 'published' is no longer a valid term"; Lifecycle §Draft: "cannot be launched until at least one product has been added" vs Home C-09: "Catalog holds zero visible products"; C-16: "≥1 visible product exists"; C-12: an Incomplete bundle "cannot satisfy the launch gate"	A) Products added, so visibility is ignored and Home C-09/C-16 are reworded to "added" (matches Launch and Lifecycle). B) Visible products, so Launch and Lifecycle are amended. Suggest A, or B if a store with only hidden products must not go live	The header Launch button and the Home cards will disagree, for example "Add a product before you launch" shown while Launch is enabled. The core launch predicate can't be built
Q-2	P1	Gap	What is the role and permission model? Specifically: how is the store "owner" assigned, can a store have several reps, what can a non-owner rep do, and which My Team(s) actions may a team manager or "league director" perform?	OI-12, OI-37. Lifecycle Epic E: "a rep who is not the owner opens the Detail tab... Archive Store action is not visible"; Lifecycle §Definitions: "managing rep"; Roster §Solution: "store managers (reps, team managers, league directors) build and manage team structure"; Settings A2b: the portal has "exactly two areas — Reporting and Rosters (no products, orders, settings, or vault)"	Supply a permission matrix: Owner rep / co-rep / team manager (portal) / league director × actions (archive, close/re-open, Clear/Delete Roster, duplicate policy, Move, Roster Bank commit, product assignment). Suggest: owner = the creating rep; co-reps get everything except Archive; team managers get roster add/edit only; drop "league director" or define it	Authorization can't be implemented, and Archive, roster and close-report permissions will be guessed

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-3	P1	Conflict	Which Store Close Report definition is authoritative for team managers, format, seen-state and blocking behavior, and what is the final metric set?	OI-21. Lifecycle §Roles: "Team-manager role: full parity with the rep for this report... No separate dealer or decorator view is required"; "Seen state is per user"; Epic H: modal shown "before any other workspace content is actionable" vs Settings Epic H: "a separate variant is generated for team managers... excludes dealer profit"; "a seen/dismissed flag per rep"; "It gates nothing and blocks no action"; "OPEN — to be confirmed: the exact metric set on each version... whether the manager version is emailed on close"	A) Lifecycle version: one report, team-manager parity, per-user seen state, blocking modal. B) Settings version: a rep report plus a scoped manager variant (in-portal, no orders table, no dealer profit), per-rep seen state, non-blocking. Suggest B for scope, because the portal excludes orders, combined with the Lifecycle per-user seen state. Also confirm the metric list and whether the manager version is emailed	The data scope, export permissions and the seen-state model of the report are undecided. Team managers could see dealer margins or order data that the portal excludes
Q-4	P1	Gap	Which Settings fields lock after launch?	OI-22. Settings Epic B: "the exact fields/inputs that lock after launch are TBD and must be defined before build"; "Whether re-binding the store to a different team should be permitted after launch is part of the TBD lock list"; Home Epic G: "Team Logo and Team Colors do not lock after launch either — decided, and to be recorded in Settings Epic B's lock list (Appendix A, 8d)"	Confirm a list. Suggested lock list: web address, store type/format, fulfillment method, tax settings, re-bind (Change Team). Exempt: point of contact, ship-to address, Team Fundraising, managers, Customization & Design, Team Logo/Colors	The edit-permission layer for launched stores can't be built, and Home's editable brand panel may become a route around a lock

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-5	P1	Gap	How do repeating close dates and per-team-code order windows interact with the single store status (Open/Closed)?	OI-26, OI-27. Settings Epic E: "League stores can turn the single window into a repeating close cadence — Weekly, Every 2 weeks, Monthly, or End of season"; "schedule at store level or per team code — ... start/end/timezone per row" vs Lifecycle transitions: "Closed → Open: Manual only — rep clicks Re-open Store"	A) Each repeating close date closes the whole store (with a Close Report) and the rep must re-open it manually. B) Repeating dates and team windows are order-intake cut-offs only: the store stays Open, and buyers of a team whose window has ended are blocked. The store auto-closes only at the store-level close date or at the last team window. Also define "End of season" and the timezone of the store-level close date. Suggest B	The scheduler, order-intake enforcement, auto-close timing and the close-event/report generation can't be designed
Q-6	P1	Conflict	What are pending-order shipping containers keyed on: rosters ("roster group / standalone roster") or teams and divisions? Where do orders for teams with no roster, and fan orders, go?	Consolidator finding (no OI). Orders Epic B: "League stores render one container per roster group plus one per standalone roster; Single-Team stores get a single container"; Orders deps: "keyed to the store's roster architecture (roster groups / standalone rosters / single team)" vs Roster §Object model: Team is "The unit everything else keys off: product assignment, shipping containers"; Roster: "There are no free-standing rosters"; "a team may exist with no roster attached"	A) One container per division plus one per standalone team (team-keyed, roster-independent); fan orders join their selected team's container, or a store-level container if no team is selected. B) Keep roster-keyed containers and define the no-roster and fan cases. Suggest A, and update Orders terminology from "roster group" to "division"	Order grouping, MOQ progress and freight routing will be wrong, or will fail for roster-less teams and fan orders
Q-7	P1	Gap	What are the MOQ thresholds and the minimum-quantity fee formula, and where do they come from?	OI-30. Orders deps: "Pending submission needs MOQ thresholds and minimum-quantity fee calculation per shipping container"; Epic B: "an info tooltip stating the fee that applies if submitted short"	Specify the source (per product, per factory/brand, or per container), the unit (items or garments), and the fee formula (flat, or per missing unit). Suggest per-factory MOQ from the factory/catalog service with a per-shortfall-unit fee	The MOQ ring, the tooltip, the review-modal fee and the Home C-02 card can't be built

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-8	P2	Conflict	Which tab hosts the Store Status card (Close / Re-open / Archive), and what are the canonical workspace tab names and action labels?	OI-1. Lifecycle Epic B: "rep opens the Store Status card on the Detail tab"; transitions: "rep clicks Pause on the Store Status card", "Danger Zone of the Detail tab"; Epic A tabs "(Detail, Products, Roster, Orders, Reports)" vs Launch: "the Settings tab's Store Status card"; Settings: "Schedule & Status → Store Status"; Home Epic A: "Home, My Team(s), Products, Orders, Reports, Settings"	Suggest Settings → Schedule & Status → Store Status card, with the actions "Close Store" and "Re-open Store" (no "Pause"), and the six Home tab names. Amend Lifecycle	The controls are placed inconsistently and deep links break
Q-9	P2	Conflict	Who can un-archive a store: a managing rep, or Prolook support only?	OI-2. Lifecycle §Archived: "restoring an archived store can only be done by a managing rep" vs transitions: "Archived → Open or Closed: Not self-service. Requires a Prolook support request. Support staff only."	A) Support staff only, through an internal admin tool. B) A managing rep in the UI. Suggest A (it matches Epic E and Settings Epic C)	The un-archive permission and the admin tooling scope are unclear
Q-10	P2	Gap	Can a Draft store be archived?	OI-10. Lifecycle transitions list only "Open → Archived" and "Closed → Archived"; "There is no store deletion" vs Settings Epic C: "Given a store, when the owning rep opens Schedule & Status, then an Archive Store action is available"	A) Allow Draft → Archived. B) Draft stores can't be archived or deleted. Suggest A, so abandoned drafts can be cleared	Abandoned drafts pile up in the stores list
Q-11	P2	Conflict	Where are archived stores listed, and how does a rep open an archived store's read-only workspace and Close Reports?	OI-4. Launch §Status surfaces: "their cards appear only in the Archived Stores section of the Account page" vs Lifecycle Epic E: "the store no longer appears in the list"; Lifecycle matrix: "Removed from list entirely"	A) Build an Archived Stores section on the Account page as the only entry point. B) Add an "Archived" filter to the Stores tab. Suggest A, plus a spec for that section	The read-only archive and its retained reports are unreachable

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-12	P2	Gap	What happens to pending (unsubmitted) orders when a store is archived?	OI-33. Lifecycle matrix (Archived): "Read-only — all records viewable, nothing editable"; "Existing / in-flight orders: Unaffected — retained as read-only history"	A) Block archiving while pending orders exist. B) Allow Submit on archived stores as the only permitted action. C) Cancel or refund pending orders on archive. Suggest A	Paid orders could be stranded and never reach the factory
Q-13	P2	Gap	If a pop-up store is re-opened after its close date without the schedule being edited, does it auto-close again immediately, stay open indefinitely, or require a new close date?	OI-11. Lifecycle Epic C: "they can re-open to Open from the Store Status card and optionally edit the store schedule"; matrix (Closed): "Suspended — does not advance"	A) Re-open requires a future close date (or switching to Always open). B) The store stays open until it is closed manually. Suggest A	Re-opened stores could immediately re-close or run with no deadline
Q-14	P2	Gap	What is the "open date" of the Active Order Window for always-open stores and for re-opened stores (used by the Close Report and by "This season")?	OI-9. Lifecycle §Close Report: "Active Order Window (open date → close date)"; "A store that is re-opened and later closed again produces a new close event with a new report scoped to the new window"; Reports Epic D: "This season (the store's open window)"	A) The most recent transition into Open (launch or re-open). B) The scheduled Opens date where one is set, otherwise the launch date. Suggest A	Report scoping and the close-event record are ambiguous, and figures may double-count across windows
Q-15	P2	Gap	Who receives the launch email when the roster is empty or there is no team manager? Do players added after launch receive it? What is the email content?	OI-8. Launch §Launch confirmation modal: "all players and the team manager receive an email that the store was created"; Launch §Gate: "no roster gate applies at launch"	Suggest: send to the rostered players' contact and associated emails plus all manager records' emails at launch time; no send for later additions (Share Team Store Link covers those); skip silently when there are no recipients. Provide the template	The notification can't be implemented, and the modal copy promises sends that may not happen
Q-16	P2	Ambiguous	Is the "manual, asynchronous verification" paragraph (EIN, banking, admin review queue, 24–48 hr wait) in the Lifecycle dependencies in scope?	OI-7. Lifecycle deps: "Verification is a manual, asynchronous process — not an automated check. Requires: secure database storage for application submissions (business-entity fields incl. EIN and banking...)... 24–48 hr waiting period"	A) It was pasted from another spec by mistake, so remove it. B) It is in scope and gates launch, so specify it. Suggest A	The team may build, or estimate, a verification system that nobody asked for

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-17	P2	Conflict	Does the Close Report keep any "Team Profit" figures, and does a Store Close Report entry sit at the top of the Reports tab?	OI-40. Lifecycle detail layer: "the Team Profit chart for the window"; Summary PDF: "the Team Profit trend"; Settings deps: "profit split" vs Reports Epic C: "Renamed from the Team Profit chart... with that input removed, the chart reports revenue"; Lifecycle: "A Store Close Report entry sits at the top of the Reports tab" (not in the Reports Epic A composition)	Suggest: replace every Team Profit reference with Team Revenue (League Revenue in league stores), drop "profit split", and add the Close Report entry to the Reports Epic A layout above the KPI row	The report shows a metric with no data source, and the Reports layout is incomplete
Q-18	P2	Conflict	In the Close Report, is Net Fundraising shown when store fundraising is disabled but items are still collecting?	Consolidator finding (no OI). Lifecycle summary layer: "Net Fundraising (only when Team Fundraising is enabled; Avg. Order Value is promoted into this slot when it is disabled)"; edge case: "The Net Fundraising hero figure and the fundraising breakdown are omitted entirely" vs Reports deps: the report "renders in the first and third states" (enabled; disabled with items still collecting)	Suggest: follow the three-state read, so fundraising figures appear in the enabled state and in the disabled-with-exemptions state	Collected fundraising money disappears from the close summary
Q-19	P2	Ambiguous	Define the KPIs exactly. Does Orders include pending, cancelled or refunded orders? Is Total Revenue net of refunds, and does it include tax, shipping and MOQ fees? Is AOV per order or per session? Is the trend baseline last month or last period?	OI-41. Reports Epic B: "Orders — total volume count of closed sales"; "Pending Orders — count of active orders currently processing"; "Avg. Order Value — average amount spent per order/session"; Reports Epic C: "gross buyer spend"; Lifecycle: "Refunds and cancellations net out of revenue consistently with the Reports tab"; "Figures reconcile... matches the corresponding figure on the Reports tab for the same window"	Suggest: Orders = submitted, non-cancelled orders; Pending = Orders-tab pending (placed, not submitted); Revenue = gross buyer spend excluding tax, net of refunds; AOV = revenue / orders; trend = previous calendar month (previous window for the Close Report). Reports aggregation must accept a date range so the Close Report can reconcile	The aggregation queries can't be written, and the Home, Reports and Close Report figures will not reconcile

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-20	P2	Ambiguous	What is the canonical order and fulfilment status list?	OI-31. Orders Epic D: "Submit Date → Order Confirmed → production stages → Delivery" vs Lifecycle detail layer: "Order placed → Confirmed → Artwork → Factory production → Shipped → Delivered"; Home C-18: "Every order reaches Delivered or is cancelled"	Provide one enum, for example: Pending → Submitted → Confirmed → Artwork → In production → Shipped → Delivered, plus Cancelled and Refunded	The status enum, the Order Status Guide, the filters and the C-18 predicate are inconsistent
Q-21	P2	Gap	Is the Customizer 3.0 hand-off contract defined, and how are the QX7 entitlement API and its failures handled?	OI-44. Customize deps: "Requires integration with the external 'Customizer 3.0' design tool (referenced but outside these files)"; C1: "auto-populates Team Name, Team Colors, and Logos"; A1: "The brand list is entitlement-filtered from QX7"	Provide the QX7 endpoint, payload (including the brand-type field), caching/refresh and timeout behavior (suggest: show an error state on the pill and keep the other chips working), and the customizer launch parameters and return/abandon callback	Integration can't start, and a QX7 outage could break Add Products
Q-22	P2	Gap	Several specs that these documents defer to are not in the input set. Can they be provided, or confirmed as already built?	OI-19, OI-39. Home deps: "C-27 depends on an amendment to Products Tab that must land first"; Reports deps: "Product Catalog Management, Governing rule 3"; Customize C2: "per Governing rule 1"; Roster Epic 5: "specified in the Roster-Optional Architecture (Open Access Stores) spec, Epic C"; also Step 1 — Basics, Step 2 — Divisions & Teams, Pick Up Locations, Storefront Announcement Banner, System Modals & Toasts, Tabbed Store Dashboard	Provide the Products Tab / Product Catalog Management spec (governing rules 1–3; Epics E, F, H, I, J, L), Product Categories, Roster-Optional Architecture, Step 1/Step 2, Pick Up Locations, Storefront Announcement Banner, System Modals & Toasts and Tabbed Store Dashboard, or mark each as existing	The commercial lock, the product predicates (C-09 to C-13, C-23, C-27), Roster Bank, team selector and modal behavior can't be implemented

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-23	P2	Gap	Is Home's Appendix A (amendments 8b, 8d, 8e, 10) available and accepted? In particular, is "Add from Team Database" on the manager card decided?	OI-17, OI-23. Home Epic A: "The Tabbed Store Dashboard shell must be amended — see Appendix A"; Epic F: "Settings Epic A1's standing open question closes as yes... (Appendix A, 8b)"; "Settings must adopt the same term, and Home must not ship ahead of it... amendment 8e" vs Settings A1: "OPEN — to be confirmed: whether this re-fetch should be surfaced on the League/Team Manager Information card"	Provide Appendix A and confirm each amendment: 8b Add from Team Database on the manager card (yes); 8d logo/colors not locked; 8e "Point of Contact" replaces "primary" in Settings; 10 header chip uses "Open", not "Active"	Home is blocked by its own sequencing rule, and Settings and Home will use different labels
Q-24	P2	Gap	Do Team Database coach records carry a mailing address and a role/title? If an imported coach has no address, what happens?	OI-24. Settings A2c: "OPEN: whether Team Database coach records carry an address that could populate this on import"; deps: "The Team Database coach schema — specifically whether records carry a mailing address and a role or title — is an open dependency"; A3: "the address is required for order fulfillment"	Confirm the schema. If there is no address, the imported record is saved without one and flagged as not fulfillment-ready (the freight gate catches it)	The import mapping and the address validation for imported managers can't be built
Q-25	P2	Gap	What is the announcement message character limit and the allowed rich-text marks (links?), and should the theme color picker warn or block on low contrast?	OI-25. Settings Epic I: "Character limit and permitted marks — OPEN... (in particular whether links are allowed) are undecided and implementation-blocking"; "Contrast — OPEN. Whether the picker warns or blocks on a color with insufficient contrast"	Suggest: 500 characters; bold, italic, lists and https links only; contrast warns but does not block (WCAG AA 4.5:1 check)	The editor, the sanitizer allow-list and the picker can't be finalized

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-26	P2	Conflict	After store-level fundraising is disabled, do NEW orders on commercially locked items still collect fundraising, or only orders that were already placed?	Consolidator finding (no OI). Settings A4: "Team Fundraising off at store level while ordered items continue to collect"; "An item carrying a non-cancelled order has its fundraising toggle locked" vs Reports Epic D banner: "the figures below cover items that were already ordered"; "the report covers only those items whose fundraising was enabled at the time of the order"	A) Locked items keep adding fundraising to new orders until all their orders are cancelled. B) Only existing orders keep their fundraising, and new orders don't. Suggest A per Settings, with the Reports banner reworded	Buyers may be charged, or not charged, fundraising inconsistently, and reports misstate the totals
Q-27	P2	Gap	What are the platform-fee and card-processing-fee rates or formulas used to derive Net Fundraising?	OI-42. Reports deps: "platform-fee and card-processing-fee calculations to derive net fundraising"	Provide the rates (for example, platform X% of fundraising; card processing Y% + $Z per transaction, pro-rated to the fundraising portion) and the source system	Net Fundraising can't be computed
Q-28	P2	Gap	Is there a PO settlement state, and where does it come from?	OI-34. Home C-20: "≥1 order in the window with an open PO", clears when "PO settles"; Lifecycle edge case: "Closed with unsettled payment (open PO)" vs Orders Epic B: payment is entered only "as a PO Number"	A) Add a PO payment status (Open/Settled) fed by the finance/ERP system. B) Drop C-20 and the needs-attention strip for now. Suggest A if finance data exists, otherwise B	The C-20 predicate and the Close Report strip have no data
Q-29	P2	Gap	Which new addressable views and filters must the owning tabs add for Home routes, and is the "store-wide player view" a new My Team(s) surface?	Consolidator finding (no OI). Home C-05: resolves to "My Team(s) → store-wide player view, filtered to incomplete"; Home deps: "C-05's incomplete-player view, C-10's render-pending filter, C-23's exempted-item filter — that filter must be added to the owning tab... Audit which of those filters exist today" (Roster defines only a store-wide Roster Bank view)	Confirm the new work: a store-wide player list with an incomplete-gear filter in My Team(s); Products filters for render-pending, exempted and orphaned items; Orders filters for open PO and not-yet-shipped	Home routes land nowhere, and the scope is underestimated

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-30	P2	Gap	Where do submitted player (team-gear) orders appear in All Orders, and with which origin badge?	OI-29. Orders §Problem: "their own rep-placed orders, individual player orders for team-required/supplied gear, and fan orders"; Epic A: "consolidating the rep's own orders and fan orders into one view, with each row badged by origin (My Order / Fan)"; Lifecycle detail layer: "order origin badge"	Suggest: All Orders includes player orders with a third badge, "Player" (enum: My Order / Player / Fan)	The order list query and the badge enum are incomplete, and player orders are invisible after submission
Q-31	P2	Conflict	Can the pending-order update (Orders Epic E) also rewrite the Direct-to-Home shipping address, or only number and name?	OI-38. Roster Epic 3: "nothing in this tab writes an address back onto a placed order... the divergence treatment in Epic 2 applies to the Player Address column"; Orders §Governing rule: snapshot includes "the shipping address"; Epic E: "snapshot is rewritten from the player's current roster values"	A) The update covers all snapshotted fields, including the address. B) Number and name only; address divergence is information only. Suggest A while pending, so a wrong address can be fixed before submission	The scope of the update endpoint and its UI is unclear, and wrong-address shipments are possible
Q-32	P2	Gap	The order line snapshots "size", but the player record has no size field. Is size a roster field, and can size diverge?	Consolidator finding (no OI). Orders §Governing rule: "Jersey number, name on jersey, size, and... the shipping address are written onto the line"; Roster schema lists First/Last Name, Jersey Number, Name on Jersey, Contact Email, Phone, Shipping Address, Associated Emails (no size); Roster §Problem: "names, numbers, emails, sizes, addresses"	A) Add an optional Size field to the player record, with divergence and update support. B) Size is buyer-chosen at checkout only, so it is not compared with the roster. Suggest B	The data model and the divergence comparison are inconsistent
Q-33	P2	Gap	Is a pending-order update recorded in an order amendment history (what, when, who)?	OI-32. Orders Epic E: "OPEN — to be confirmed: whether an update is recorded against the order for support purposes... the order currently has no amendment history"; deps: "should be settled before build"	Suggest yes: a minimal amendment record (field, old value, new value, user, timestamp) shown in the order drawer	Parent disputes can't be resolved, and the endpoint design may need rework

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-34	P2	Ambiguous	Is a pending order "approved" by the rep, or only "submitted"? Is there an approval state?	OI-28. Orders Epic A: "placed in the storefront but not yet approved by the rep and sent to the factory" vs Home C-01: "There is no approval step in the product... Home says 'n pending orders to submit', not 'approve n orders'"	Suggest: no approval state; the lifecycle is storefront → pending → submitted, and the Orders copy changes to "not yet submitted"	Wrong state modelling and inconsistent copy
Q-35	P2	Gap	What happens to pending orders, their group and their team code when a team (or a division) is deleted?	Consolidator finding (no OI). Roster deps: "team deletion must remove the team from shared state, which product assignment and shipping containers consume"; Roster Epic 0: "Deleting a division keeps its teams — they become standalone"	A) Block team deletion while the team has pending or submitted orders. B) Allow it and move the orders to a store-level group. Suggest A	Orphaned pending orders with no routing
Q-36	P2	Conflict	Is the division-wide assignment inheritance rule (teams added later inherit) decided or open? What happens to inherited products when a team leaves its division?	OI-35. Roster Epic 6: "A product assigned to a division applies to every team in that division, including teams added to the division after the assignment was made" vs Roster deps: "the inheritance rule for teams added to a division after a division-wide assignment is open (see Epic 6)"	Suggest decided: store the division scope as a rule (not a drop-time fan-out); teams that leave the division (or become standalone when it is deleted) lose the inherited products	The assignment data model can't be chosen
Q-37	P2	Conflict	May a player who has team-gear orders be moved to another team? Are moves allowed when the store is Open or Closed, and are moves logged?	OI-36. Roster Epic 7: "Given a player with one or more team-gear orders, when a move is attempted, then the move is refused" vs Roster §Governing rule: "Roster edits are never blocked by order state"; Orders §Governing rule: "moving them to another team... leaves every existing order line exactly as it was"; Roster: "OPEN — the order-state block above should be reconsidered... Recommend the latter"	A) Keep the refusal. B) Permit the move and state on the confirmation that existing orders still ship to the origin team's group. Allow it in Open and Closed; log it in activity history. Suggest B	The Move-to-team rules and freight outcomes are undecided

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-38	P2	Ambiguous	Are jersey numbers "0" and "00" distinct values?	Consolidator finding (no OI). Roster schema: Jersey Number "Integer, 00–99"; "2-digit numeric input"	Suggest: store as a string with pattern 0–99 or 00, so "0" and "00" are distinct (as in common jersey practice)	Integer storage merges 0 and 00, which breaks uniqueness and the printed value
Q-39	P2	Gap	In "Team manager chooses on behalf of players" mode, how is a buyer matched to a roster player, and what happens if the player has no record or no number?	Consolidator finding (no OI). Settings Epic F: "Team manager chooses on behalf of players (numbers assigned on the roster; buyers see their assigned number, no entry at checkout)" vs Roster §Solution: rosters are optional and populate "before launch, during the ordering window, or not at all"	Suggest: the buyer selects the player from the team's roster at checkout; if the player isn't found or has no number, fall back to buyer entry with taken numbers locked	Checkout can't resolve the number, and orders may carry no personalization
Q-40	P2	Gap	How does freight routing work for Direct-to-Home stores, for standalone teams in leagues, and for single-team stores? Does the Assign Managers gate (and Home C-04) apply to each?	Consolidator finding (no OI). Orders Epic B: "Given a submission that includes a group whose fulfillment routing is unresolved (missing group/team manager), then an Assign Managers modal blocks the flow"; Settings A3: mapping "Shown only for League stores whose fulfillment method is Ship to Team Manager"; "each division routes to the league manager, a single division manager, or individual team managers"	Suggest: Direct-to-Home has no manager gate (each line ships to its snapshotted address); standalone teams map to the league manager or a team manager; single-team stores use the ship-to destination (C-04)	The freight gate fires wrongly, or never fires, for some store types
Q-41	P2	Conflict	Is the ship-to destination the primary manager's address or a reference to a saved Pick-up Location? What happens when the primary changes or a location is selected?	Consolidator finding (no OI). Settings A3: "This is the same record as the address captured in Step 1 — Basics, Epic F, and the same address held on the store's primary manager record"; "A selected location is held as a reference, not a copy"	A) The destination is its own field (an address or a location reference), separate from manager addresses. B) It is always the primary manager's address, and selecting a location overwrites it. Suggest A	Changing the primary or the location could silently reroute freight

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-42	P3	Ambiguous	Does Closed reuse Draft storefront behavior ("technically equivalent to a draft") or show the closed landing page?	OI-3. Launch §Status semantics: "Closed suspends ordering (technically equivalent to a draft)" vs Lifecycle matrix: Draft "storefront URL is inaccessible to buyers"; Closed "'This store is closed' landing page"	Suggest: Closed shows the closed landing page per Lifecycle; remove "technically equivalent to a draft"	Storefront routing for Closed is unclear
Q-43	P3	Ambiguous	Does Close Store use a confirmation modal, a toast, or both? Does Re-open show a toast?	OI-5. Lifecycle Epic B: "when the confirmation appears, then it discloses"; Epic D: Re-open "requires no confirmation modal" vs Launch: "Status changes confirm with toasts"	Suggest: Close = confirmation modal, then a success toast; Re-open = no modal, success toast	Inconsistent UX
Q-44	P3	Ambiguous	Are "Open Stores count" and "Active Stores KPI card" the same Overview KPI, and what is its label?	OI-6. Lifecycle matrix: "Overview KPI — Open Stores count" vs Epic G: "the Active Stores KPI card on the Overview"; Home Epic I: "Open (not Active)"	Suggest: a single KPI labelled "Open Stores", counting Open only	Wrong KPI label, which conflicts with the vocabulary rule
Q-45	P3	Gap	Archiving an Open store closes its window without a close event. Should a Close Report be generated for that final window?	Consolidator finding (no OI). Settings Epic H: "archiving (Epic C) does not generate or regenerate a report" vs Lifecycle §Archived: "any active ordering window is closed"	A) Generate a Close Report on Open → Archived. B) No report. Suggest A, or require Close before Archive	The final season of a store archived while Open has no summary
Q-46	P3	Conflict	Does C-15 fire at 14 days or only inside the 7-day C-14 range?	OI-14. Home C4 notes: "C-14 matches the pill at 7 days. C-15 fires earlier, at 14 days" vs C-15 trigger: "C-14's trigger and C-05's trigger both hold"	Suggest: C-15 trigger = "≤14 days left and C-05 holds", independent of C-14	The C-15 predicate is ambiguous
Q-47	P3	Ambiguous	When can C-17 (close report not yet viewed) ever show, given that the report auto-presents and any dismissal marks it seen?	OI-15. Home C-17 trigger: "this user has not seen the report for this close event"; Lifecycle: "Any dismissal marks the report as seen for that user"; Epic C: "a banner or status indicator informs them"	A) Drop C-17. B) Keep it as a fallback when the modal failed to load. Suggest A	A dead condition is built and tested

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-48	P3	Gap	What is the fixed within-tier rank ("cost of delay") for each Home condition?	OI-16. Home §Presentation: "order by cost of delay, defined as a fixed per-condition rank recorded in the catalogue above" (no rank column exists)	Add a rank column; suggest ordering by catalogue ID within each tier as the default	Card ordering isn't deterministic
Q-49	P3	Gap	Will the Team Manager Portal get a Home-equivalent area?	OI-18. Home §User persona: "OPEN — to be confirmed... whether the Team Manager Portal gains an equivalent surface... Recommendation: no, this version. Confirm before build."	Suggest no for v1 (the spec's recommendation)	Scope ambiguity for the portal
Q-50	P3	Ambiguous	How many conditions are registered (24 or 25), and can C-27 hold on Draft stores?	OI-20. Home: "which of the 24 registered conditions can hold" (IDs C-01 to C-24 plus C-27); Draft row: "plus catalog conditions C-10 to C-13" (omits C-27)	Suggest: 25 registered; C-27 can hold on Draft	The resolver's per-state gating table is inexact
Q-51	P3	Ambiguous	Does Home C-05 count opted-out items as satisfied while the Orders gear drawer still shows "Not ordered" and Send Reminder for them?	Consolidator finding (no OI). Home C-05 note: "a player who has opted out is not counted as missing"; clears when "ordered or opted out" vs Orders Epic C: "each required/supplied item shows an ordered state... or a red 'Not ordered' flag" (no opt-out state)	Suggest: add an "Opted out" state to the gear drawer that counts as complete and suppresses Send Reminder	Home and the drawer counts disagree, which violates Home's count-match rule
Q-52	P3	Gap	What do the divergence line and Item View show when the player has been deleted, moved, or the roster cleared?	Consolidator finding (no OI). Orders §Governing rule: "Editing a player's number, renaming them, moving them to another team, deleting them, or clearing the roster entirely leaves every existing order line exactly as it was"; Epic D: "Item View notes the current roster value alongside the ordered one"	Suggest: no divergence is shown when no current roster record exists; Item View shows "Player no longer on roster"	Null-reference edge cases are unspecified

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-53	P3	Ambiguous	Do Roster Bank captures appear in the player gear drawer or in the Team Gear column, given that they "count toward team-gear completion" but are not players?	Consolidator finding (no OI). Roster Epic 5: "Captures are not players. They do not appear in the player table... but they do hold jersey numbers... and do count toward team-gear completion tracking"	Suggest: they count only in team-level completion aggregates, not in a per-player row, until committed	Completion figures may differ between the surfaces
Q-54	P3	Ambiguous	Is the "total raised" on the Active Order Window card order revenue or fundraising?	Consolidator finding (no OI). Settings Epic E: "the card shows the total $ amount raised during the window"; Settings deps: "an aggregate of order revenue raised during the window"; Home Epic E: "total raised" alongside fundraising	Suggest: Net Fundraising for the window if fundraising is enabled, otherwise hide the figure; label it explicitly	The wrong figure is displayed
Q-55	P3	Gap	Does the Team Revenue chart get a Day/Month/Year granularity toggle and a current-period highlight, and what is its default time bucket and range?	OI-43. Reports Epic A: "OPEN — to be confirmed: whether the Team Revenue chart carries a Day / Month / Year granularity toggle and a highlighted current-period bar"	Suggest: yes, matching Overview; default Month over the current window	The chart can't be finalized
Q-56	P3	Gap	Does the SOURCE pill brand selection persist across sessions and stores? What happens to committed products of a brand the dealership later loses?	OI-45. Customize A6: "The rep can reopen the picker and choose a different entitled brand at any point. The prior selection is visible but not pre-committed"; A5 covers only direct-URL denial	Suggest: persist the selection per rep per store; already-committed products stay live (the commercial lock) but can't be re-customized	Inconsistent pill state and an unclear catalog policy
Q-57	P3	Gap	What does the customizer pre-populate when the store has no connected team, or (in league stores) which division's branding is used?	Consolidator finding (no OI). Customize C1: "The customizer auto-populates Team Name, Team Colors, and Logos from the store's branding when opened from this flow"	Suggest: store-level branding always; blank fields when no branding exists	Undefined pre-population behavior

ID	Priority	Type	Question	Source / quoted text	Options / suggested answer	Impact if unanswered
Q-58	P3	Ambiguous	Which store-creation step hosts Add Products on League stores (Step 2 or Step 3)?	OI-46. Customize: "during store creation (Step 2 – Products)"; Roster: "Step 2 — Divisions & Teams (League Stores)" followed by "the Add Products step"; Home: "The Add Products page is identical at Step 2"	Suggest: League = Step 3 Products (after Step 2 Divisions & Teams); single-team = Step 2 Products; refer to it by name, not number	Deep links and creation-flow navigation break
