Prototype Answers — Store Home (Home Tab)

Prototype: input/prototype/Team Stores/ (React JSX, no build: `workspace-app.jsx` loaded by `Workspace.dc.html`; `workspace-app-integrated.jsx` has an identical Home tab at lines 10992–11416) · Questions: 46 · Answered 12 · Partial 17 · Contradicts 6 · Not in prototype 11

All evidence paths below are relative to `input/prototype/Team Stores/`. Line numbers are for `workspace-app.jsx`.

Screens found

- Workspace side nav (Home, My Team(s), Products, Orders, Reports, Settings) — workspace-app.jsx:1716 (`WORKSPACE_NAV`), rendered by `StoreSideNav` at :1725
- Home tab: status strip, Needs your attention, Recently worked on, manager panel, In your store, League structure, Brand assets, setup-guide link — workspace-app.jsx:10980–11404 (`buildHomeAttention`, `HomeTab`)
- Store dashboard shell and tab badges (only the `embedded` layout is used, :1799) — workspace-app.jsx:11406–11598
- Settings sections (General, Store Codes, Schedule & Status, Team & Roster, Store Customization & Design, People & Access, Distribution & Fulfillment, Logo Library) — workspace-app.jsx:31070–31079; General content `GeneralInfo` at :18476
- Orders tab (All Orders, Pending Orders, Returns & Refunds) — workspace-app.jsx:24544 (`OrdersTabV2`)
- Products catalog list and filters — workspace-app.jsx:29238 (`ProductsListV2`)
- My Team(s) canvas and Roster Bank — workspace-app.jsx:13469, :14890
- Reports tab — workspace-app.jsx:12071 (`PayoutsTab`); "still need to order" page :36250
- Store Close Report (auto pop-up and entries) — workspace-app.jsx:32759, :32809
- Store Setup Guide — workspace-app.jsx:33054; separate first-store onboarding tour :28047
- People & Access invite list — workspace-app.jsx:31319 (`TMAccessSection`)
- Store creation Step 1 — :8119; Review step — :9972

Answers

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-1	P1	Contradicts	The prototype counts products **added**, not visible ones. Launch is enabled and Home shows C-16 instead of C-09 as soon as one product exists, even if it is hidden (new stores get stock items "hidden until you turn them on"). The requirement's C-09/C-16 say "visible".	workspace-app.jsx:11449 — `const canLaunch = (store.products ...).length > 0;`; workspace-app.jsx:11035 — `if (((store.products ...).length) === 0) {` (C-09 card); workspace-app.jsx:28045 — `"stock items added, hidden until you turn them on"`. Requirement C-16: "Store is Draft **and** ≥1 visible product exists"	High

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-2	P1	Not in prototype	No C-15 card exists. Also, the prototype's C-14 has no days-left threshold at all (see Q-38).	searched: "haven't ordered", "window closes in", C-15, 14 days, `daysLeft` in buildHomeAttention — only C-14 at workspace-app.jsx:11079	—
Q-3	P1	Partial	Cards are sorted by tier colour only (red, blue, grey). Within a tier the order is the order the code adds them: Blocking C-09 or C-04 (Draft), C-03 then C-11 (Open); Action C-16, C-01, C-06; Informational C-17, C-18, C-14. There is no rank list. The rank for unbuilt cards is still open.	workspace-app.jsx:11084 — `const rank = { red: 0, blue: 1, grey: 2 };` ; workspace-app.jsx:11085 — `cards.sort(function (a, b) { return rank[a.tone] - rank[b.tone]; });`	High
Q-4	P1	Partial	The trail is a hard-coded sample list, not recorded edits. Sample rows: League "Division 7 → U12 Blue — roster", "Fan Gear — pricing", "Announcement message"; Individual "Home Jersey — pricing", "Imported 4 players", "Store banner image". These are examples only. The list of qualifying screens and edits is still open.	workspace-app.jsx:11180–11188 — `const trail = (!store.seeded ... lc.draft) ? [] : isLeague ? [ { name: "Division 7 → U12 Blue — roster", ...`	Low
Q-5	P1	Partial	Some filters already exist, but Home doesn't use them. Products has "Render pending" (Decoration) and "Collecting" (Fundraising) filters. A store-wide "Not ordered only" player list exists on the Reports "still need to order" page, not in My Team(s). Orders has no unpaid/open-PO filter: open PO shows only in the Close Report. Home's buttons open the tab with no filter.	workspace-app.jsx:29280 — `{ k: "deco", label: "Decoration", opts: ["All", "Not decorated", "Render pending", ...` ; workspace-app.jsx:36310 — `>Not ordered only <span` ; workspace-app.jsx:32333 — `title="Unsettled payment"` ; workspace-app.jsx:11134 — `if (card.kind === "products") onGoTab("products");`	Medium

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-6	P2	Partial	On Draft stores the prototype shows C-09 and C-04 as red (Blocking) cards. C-11 is only built for Open stores, and C-12 isn't built. C-04 fires on any Draft store with an empty ship street; it doesn't check the fulfillment method, and Open stores never get it. Whether the Blocking definition should change is still open.	workspace-app.jsx:11036 — `cards.push({ tone: "red", navTab: "products", kind: "products", title: "Add a product before you launch"` ; workspace-app.jsx:11040–11041 — `if (!String(store.shipStreet ... "").trim()) { cards.push({ tone: "red", ... "Add a delivery address before orders can ship"` ; workspace-app.jsx:11061 — `if (lc.open && failed.length) {`	High
Q-7	P2	Not in prototype	Home has no role logic: no manager variant and no card filtering by permission. A manager role exists only for the Close Report.	searched: role, isManager, manager in HomeTab and buildHomeAttention — no match; workspace-app.jsx:31794 — `function crUserId(store) { return store?.role === "manager" ? "team-manager" : "rep"; }` (Close Report only)	—
Q-8	P2	Answered	Side-nav order is **Home, My Team(s), Products, Orders, Reports, Settings**, matching option A. This is the only layout in use, because Dashboard is always rendered `embedded`. (The unused legacy tab strip lists a different order.)	workspace-app.jsx:1716–1721 — `{ id: "home", label: "Home", ...}, { id: "roster", ...}, { id: "products", ...}, { id: "orders", ...}, { id: "payouts", label: "Reports", ...}, { id: "general", label: "Settings", ...}` ; workspace-app.jsx:1799 — `<Dashboard embedded {...props} />`	High
Q-9	P2	Not in prototype	A prototype can't answer this. It contains no Appendix A list of other pages' changes.	searched: "Appendix", "amendment" — no match	—
Q-10	P2	Answered	Only red (Blocking) cards add a Home-driven dot, on the tab the card's button opens: C-03 on Settings, C-09 on Products, C-04 on Settings. C-16 (launch) adds no dot. Blue and grey cards add no dot. Separately, the prototype still shows older "not yet visited" dots saved per store in the browser.	workspace-app.jsx:11091 — `if (c.tone === "red" && c.navTab) s.add(c.navTab);` ; workspace-app.jsx:11054 — `cards.push({ tone: "red", navTab: "general", kind: "assign"` ; workspace-app.jsx:11539 — `general: !viewed.general ... homeRed.has("general"),`	High

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-11	P2	Contradicts	The prototype shows C-17 on **every** Closed store, without checking whether the report was seen, so it never clears. The auto pop-up does check the per-user seen flag. Requirement trigger: "this user has not seen the report for this close event".	workspace-app.jsx:11075–11076 — `if (lc.closed) { cards.push({ tone: "grey", kind: "report", link: true, title: "Your close report is ready"` ; workspace-app.jsx:32769 — `if (crIsSeen(store, ev)) return;`	High
Q-12	P2	Partial	C-11 opens the Products tab with no filter and no detail page, however many products failed; the headline names the product when only one failed. C-03 opens Settings → Distribution & Fulfillment focused on the **first** affected division/team. Behaviour for C-02, C-12 and C-13 isn't built.	workspace-app.jsx:11063 — `title: failed.length === 1 ? "Images failed for " + (failed[0].title ...` ; workspace-app.jsx:11134 — `if (card.kind === "products") onGoTab("products");` ; workspace-app.jsx:11049 — `if (!target) target = { groupId: g.id, rosterId: missing[0].id };`	High
Q-13	P2	Partial	C-03 is built only for **Open League** stores, for divisions in per-team manager mode. Individual Team stores never get it. It does **not** check the fulfillment method, so a League store with direct-to-home delivery could still show it.	workspace-app.jsx:11044 — `if (lc.open && (store.storeType ... "league") === "league" && org) {` ; workspace-app.jsx:11047 — `if (((org.modes ... )[g.id] ... "league") !== "teams") return;`	High
Q-14	P2	Answered	Yes, option A. A team counts as "missing" a manager unless the manager has a name, a valid email, a valid phone **and** an address. So C-03 also fires when the assigned manager has no address.	workspace-app.jsx:11048 — `filter(function (r) { return !managerComplete((org.managers ...)[r.id]); })` ; workspace-app.jsx:13235 — `return !!(hasName && isValidEmail(m.email) && isValidPhone(m.phone) && String(m.address ... "").trim());`	High
Q-15	P2	Not in prototype	No C-07 card exists. The only related UI is a grey "No products yet" pill on canvas team cards.	searched: "carry no products", C-07, "nothing to buy" — no match in Home; workspace-app.jsx:14313 shows the canvas pill only	—

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-16	P2	Partial	No C-13 card and no per-row "confirmed" flag. Products can't be added until sizing is specified, or the rep picks "Label As Shown". That suggests sizing is never left unconfirmed (supports option B), but the prototype doesn't settle whether a separate flag is needed.	workspace-app.jsx:12149–12151 — `// Shown when the user clicks "Add to Team Store" before confirming sizes on every pending product ... "Label As Shown" sets all applications to AS SHOWN and commits.`	Medium
Q-17	P2	Not in prototype	No C-27 card and no product orphaned-category state. The only "orphan" in the code is a pricing-tier override whose team was deleted.	searched: orphan, "aren't in a category", uncategorized in Products and Home — only workspace-app.jsx:30333 (pricing tiers)	—
Q-18	P2	Partial	The Order Window Scheduler flags coverage gaps but has **no "accept gap" action**, so a gap clears only when it is closed (option A in practice). C-19 isn't built on Home.	workspace-app.jsx:18358 — `<strong ...>{gap.days}-day coverage gap</strong> between ... — no team code is accepting orders in that span.`	Medium
Q-19	P2	Partial	Orders carry an `open` /settled PO flag in mock data, and the Close Report shows it ("Unsettled payment") with a callout. Orders and Home don't use it (no C-20 card, no Orders filter). The flag values are random sample data. Who records PO payment status is still open.	workspace-app.jsx:31899 — `const poOpen = i % 17 === 5;` ; workspace-app.jsx:32462 — `attention.push(... "with an unsettled payment (open PO).")`	Low
Q-20	P2	Not in prototype	No left-behind-manager prompt and no C-21/C-22 cards, so no "kept" choice is stored.	searched: "previously connected", "switched away", "left behind", "keep them", C-21 — no match	—

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-21	P2	Partial	Cards the prototype can show: **Draft** C-09 or C-16, C-04. **Open** C-03, C-11, C-01, C-06, C-14. **Closed** C-01 (any pending), C-17, C-18. **Archived** none. Gating is in the card builder. The other ~15 conditions aren't built, so the full table is still open.	workspace-app.jsx:11033–11034 — `if (!lc.archived) { if (lc.draft) {` ; workspace-app.jsx:11070 — `if (lc.open && bank.total > 0) {` ; workspace-app.jsx:11075 — `if (lc.closed) {` ; workspace-app.jsx:11079 — `if (lc.open && close) {`	High
Q-22	P2	Contradicts	The prototype mixes the labels. Home tags the record "Point of Contact". The store-creation Review step tags it "Primary Contact", a term the requirement bans. The Settings manager card shows no tag. Also, Home tags the record unconditionally (`poc: true`), ignoring the per-channel contact mode.	workspace-app.jsx:11280 — `{m.poc && <span ...>Point of Contact</span>}` ; workspace-app.jsx:10019 — `{m.primary && <span title="The Store Point of Contact inherits from this record" ...>Primary Contact</span>}` ; workspace-app.jsx:11165 — `const primaryMgr = { name: store.managerName ..., poc: true };`	High
Q-23	P2	Partial	The prototype has **no** control to change which manager is the main contact. In Step 1 it's always the main form record; "additional managers" are extras. The Settings manager card shows that one record with Edit. Home's Edit on the point-of-contact row routes to Settings → General. Where the control should go is still open.	workspace-app.jsx:8476 — `{/* Additional managers — optional contact records, not portal invitations. Only the primary feeds the point of contact. */}` ; workspace-app.jsx:18659 — `<DetailCard title={store.storeType === "league" ? "League manager information" : "Team manager information"} onEdit={() => setEditing("shipping")}>` ; workspace-app.jsx:11287 — `m.poc ? onGoSettings("store") : onManagers(null)`	Medium
Q-24	P2	Answered	No. The Settings manager card has only Edit. Team Database import lives in Edit Store Details ("Import Team Profile"), which is option B. Home offers no import link.	workspace-app.jsx:18659 — `onEdit={() => setEditing("shipping")}` ; workspace-app.jsx:10696 — `{/* Import Team Profile — opens the team database modal */}`	Medium

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-25	P2	Contradicts	On Home, Team Logo and Team Colors are read-only. "Edit ›" routes to Settings → General (option C). The theme colour's Edit routes to Store Customization & Design; only "Reset to team color" acts in place. The requirement (Epic G) says they are "Rendered, editable via the existing component" on Home.	workspace-app.jsx:11366 — `<HomeLinkBtn label="Edit ›" onClick={function () { onGoSettings("store"); }} />` (Team Logo); workspace-app.jsx:11376 (Team Colors, same); workspace-app.jsx:11390 — `onGoSettings("customization")`; workspace-app.jsx:11387 — `onUpdateStore({ primaryColor: defaultTheme })`	High
Q-26	P2	Answered	Editable after launch. Edit Store Details has no launch-based lock. The Home panel comment says only Archived locks it.	workspace-app.jsx:11357 — `{/* Brand assets — editable after launch; only Archived locks it. */}`; workspace-app.jsx:10611 `EditStoreDetailsModal` — searched live/lock/disabled in the modal: no match	Medium
Q-27	P3	Answered	"Recently worked on".	workspace-app.jsx:11251 — `<span style={sectionTitle}>Recently worked on</span>`	High
Q-28	P3	Partial	In the prototype they are **separate** (option B). A first-ever store starts a contextual onboarding tour. The Setup Guide auto-presents on any unlaunched store the rep hasn't seen. No order between them is defined.	workspace-app.jsx:28046–28047 — `// First-ever store → launch the contextual onboarding tour. if (isFirstStore) setTourRun(true);`; workspace-app.jsx:33057–33058 — `if (!store ... store.live) return; if (crReadJSON(sgSeenKey(store), false)) return;`	Medium
Q-29	P3	Answered	A Store Close Report entry sits at the top of the Reports tab, with a second entry on Settings → Schedule & Status (option A). Home's C-17 button opens the report overlay directly instead of routing to the Reports tab.	workspace-app.jsx:12093 — `<StoreCloseReportEntry store={store} variant="reports" />`; workspace-app.jsx:18810 — `variant="settings"`; workspace-app.jsx:11141 — `window.dispatchEvent(new CustomEvent("closereport:open", ...))`	High

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-30	P3	Answered	The Orders tab uses submit wording, not "approve": the Pending Orders sub-tab reads "Awaiting MOQ & submission", and Home says "to submit".	workspace-app.jsx:24634 — `{ id: "pending", label: "Pending Orders", desc: "Awaiting MOQ & submission", count: pendingCount },` ; workspace-app.jsx:11068 — `" to submit"`	Medium
Q-31	P3	Not in prototype	No C-05 card.	searched: "haven't ordered their required gear", C-05, "no email or phone" in Home — no match	—
Q-32	P3	Not in prototype	No C-07 card (see Q-15). The canvas pill says "No products yet".	searched: "Review coverage", "carry no products" — no match; workspace-app.jsx:14313 canvas pill only	—
Q-33	P3	Not in prototype	No C-10 card. Products has a "Render pending" decoration state and filter only.	searched: "still generating images", C-10 in Home — no match	—
Q-34	P3	Answered	Both only open the owning place (option A). "Retry" opens the Products tab. "Launch store" opens the normal launch confirmation modal, and only if the store has products.	workspace-app.jsx:11134 — `if (card.kind === "products") onGoTab("products");` ; workspace-app.jsx:11511 — `onLaunch={() => {if ((store.products ...).length) setShowLaunchModal(true);}}`	High
Q-35	P3	Partial	The prototype treats **any** failed render as red (Blocking), with no difference between first decoration and re-decoration. Whether to split it is still open.	workspace-app.jsx:11021 — `return p && (p.renderFailed ... p.renderStatus === "failed" ...);` ; workspace-app.jsx:11062 — `cards.push({ tone: "red", navTab: "products", kind: "products",`	Medium
Q-36	P3	Answered	Yes, reps see it. The Products catalog card shows an "INCOMPLETE" pill and "Incomplete — needs a second item", and the bundle editor uses the same words.	workspace-app.jsx:33675 — `title="Needs a second item — hidden from the storefront until then" ...>INCOMPLETE</span>` ; workspace-app.jsx:33708 — `>Incomplete — needs a second item</div>`	High
Q-37	P3	Not in prototype	No C-27 card or copy.	searched: "can't filter or search", "aren't in a category" — no match	—

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-38	P3	Contradicts	Home reads the **store-level** close date only (option A). The Settings pill treats day 7 as urgent (`<= 7`). But Home's C-14 has **no** urgent threshold: it shows whenever an Open store has a close date. The requirement: "the days-left pill is in its urgent range". Home also rounds days differently from Settings (`ceil` vs `round`).	workspace-app.jsx:11012 — `const raw = store && store.storeOpenEnd;` ; workspace-app.jsx:11079 — `if (lc.open && close) {` ; workspace-app.jsx:18548 — `const winUrgent = !closed && daysLeft <= 7;` ; workspace-app.jsx:11016 — `Math.ceil((end - new Date()) / 86400000)`	High
Q-39	P3	Partial	C-18 counts every non-pending order (All Orders = my + fan) and excludes pending, which matches option A on that point. But it doesn't check order status, so delivered and shipped orders also count. It never clears while the store is Closed.	workspace-app.jsx:10991 — `const submitted = (data.myOrders ... []).length + (data.fanOrders ... []).length;` ; workspace-app.jsx:11077 — `if (oi.submitted > 0) cards.push({ ... " still being made"`	High
Q-40	P3	Not in prototype	No C-24 card. The invite list shows no age threshold.	searched: C-24, "haven't signed in", "7 days" in Home and TMAccessSection — no match	—
Q-41	P3	Partial	People & Access uses **"Active"** and **"Invited · not logged in"** (option A wording). Home's manager rows show **no** invite status at all. The Invite link is offered on non-point-of-contact rows regardless of invite status, and it routes to Settings → General, not People & Access.	workspace-app.jsx:31368 — `/>Active</span>` ; workspace-app.jsx:31371 — `/>Invited · not logged in</span>` ; workspace-app.jsx:11286 — `{!m.poc && <HomeLinkBtn label="Invite" onClick={function () { onGoSettings("store"); }} />}`	High

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-42	P3	Partial	Draft copy exists. Empty: "Nothing needs your attention right now." (Open adds "The store is open and taking orders."). Archived: "This store is archived and read-only — nothing is awaiting action." Trail rows use "Open ›". Draft and Closed empty states don't name the lifecycle state, as the requirement requires.	workspace-app.jsx:11243 — `{lc.archived ? "This store is archived and read-only — nothing is awaiting action." : lc.open ? "Nothing needs your attention right now. The store is open and taking orders." : "Nothing needs your attention right now."}` ; workspace-app.jsx:11260 — `<HomeLinkBtn label="Open ›"`	Medium
Q-43	P3	Answered	The tab reads "My Team" on Individual Team stores and "My Teams" on League stores, and the rail row uses the same label (option B). Neither reads "My Team(s)" literally.	workspace-app.jsx:1726 — `it.id === "roster" ? ((store && store.storeType === "league") ? "My Teams" : "My Team")` ; workspace-app.jsx:11202 — `{ id: "roster", label: isLeague ? "My Teams" : "My Team", sub: st.players + " players"`	High
Q-44	P3	Contradicts	Home's "n orders" **includes** pending orders (option B). The Orders tab's All Orders list is my + fan orders only, with pending on its own sub-tab. So the rail figure doesn't match the tab, against the requirement's "order counts follow the Orders tab's".	workspace-app.jsx:10992 — `return { pending, submitted, total: pending + submitted, pendingGroups };` ; workspace-app.jsx:11204 — `sub: (oi.total) + " orders"` ; workspace-app.jsx:24604 — `// All Orders = rep-placed (My) + fan-placed (Fan)`	High
Q-45	P3	Answered	The Reports row is a route with the sub-line "Store analytics" and no figure. Total raised appears in the status strip above, not in the rail. There is no Settings row.	workspace-app.jsx:11205 — `{ id: "payouts", label: "Reports", sub: "Store analytics" }` ; workspace-app.jsx:11221 — `<strong ...>{fmtMoney(raised)}</strong> raised{lc.open ? " this window" : ""}`	High

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-46	P3	Partial	Home's "Team artwork library — team-level, spans seasons" link goes to Settings → General. A separate Settings "Logo Library" section exists ("Approved artwork from the ERP") but Home doesn't link to it. The right destination is still open.	workspace-app.jsx:11392–11393 — `onClick={function () { if (!readOnly) onGoSettings("store"); }} ...>Team artwork library`; workspace-app.jsx:31079 — `items.push({ id: "logos", label: "Logo Library", desc: "Approved artwork from the ERP" });`	Medium

Answered — no need to ask the US team

12 question(s) the prototype settles. Remove these from the list sent to the requirement owners.

ID	Priority	Question	Answer from prototype	Evidence	Confidence
Q-8	P2	Please confirm the tab order is **Home, My Team(s), Products, Orders, Reports, Settings**. The Tabbed Store Dashboard page still says there are exactly five tabs, in a different order. The Setup Guide's "tabs" card also lists the old five. Will both be updated?	The order is Home, My Team(s), Products, Orders, Reports, Settings (option A), in the only layout in use.	workspace-app.jsx:1716–1721 — `WORKSPACE_NAV` order; workspace-app.jsx:1799 — `<Dashboard embedded {...props} />`	High
Q-10	P2	Should blue Action cards put a dot on their tab's label? The page says Blocking cards do and Informational cards don't, but says nothing about Action cards. Also, which tab gets the dot for C-03 (an orders problem that is fixed in Settings) and for C-16 (which links to the Launch button, not a tab)?	Blocking only. The dot goes on the tab the button opens: C-03 on Settings, C-16 none.	workspace-app.jsx:11091 — `if (c.tone === "red" && c.navTab) s.add(c.navTab);`; workspace-app.jsx:11054 — `navTab: "general", kind: "assign"`	High
Q-14	P2	Orders are also blocked when a manager is assigned but has no address. Should card C-03 cover that case too?	Yes, option A. A manager without an address counts as missing, so C-03 fires.	workspace-app.jsx:13235 — `isValidPhone(m.phone) && String(m.address ... "").trim()`	High

ID	Priority	Question	Answer from prototype	Evidence	Confidence
Q-24	P2	Will the Settings manager card get an "Add from Team Database" action? Home relies on it: Home has no import button and sends reps to Settings → General to import a coach. But Settings still lists this as an open question.	No. The Settings manager card has only Edit, and import lives in Edit Store Details → Import Team Profile (option B).	workspace-app.jsx:18659 — `onEdit={() => setEditing("shipping")}`; workspace-app.jsx:10696 — `Import Team Profile — opens the team database modal`	Medium
Q-26	P2	Please confirm that Team Logo and Team Colors can still be edited after a store launches. The Settings page still lists what locks after launch as "to be decided", including changing the team.	Editable after launch; only Archived locks them.	workspace-app.jsx:11357 — `Brand assets — editable after launch; only Archived locks it.`	Medium
Q-27	P3	What is the "recent edits" section called? The summary at the top calls it "Pick up where you left off", but Epic D says the name is "Recently worked on".	"Recently worked on".	workspace-app.jsx:11251 — `Recently worked on`	High
Q-29	P3	Where is the Close Report link on the Reports tab? Home sends reps there (card C-17, and the Close Report link for Closed and Archived stores), but the Reports tab page doesn't list a Close Report entry.	At the top of the Reports tab, plus Settings → Schedule & Status (option A).	workspace-app.jsx:12093 — `<StoreCloseReportEntry store={store} variant="reports" />`	High
Q-30	P3	The Orders page says pending orders are "not yet approved by the rep". Home says there is no approval step and bans the word "approve". Should the Orders page be corrected to "not yet submitted"?	Yes. The Orders tab already says "Awaiting MOQ & submission".	workspace-app.jsx:24634 — `desc: "Awaiting MOQ & submission"`	Medium
Q-34	P3	Do the "Retry" button on card C-11 and the "Launch store" button on card C-16 do the action from Home, or just open the place where the rep does it (the product page, or the Launch button in the header)? Home is not supposed to change anything itself.	Both only open the owning place. Retry opens Products; Launch store opens the launch confirmation modal.	workspace-app.jsx:11134 — `onGoTab("products")`; workspace-app.jsx:11511 — `setShowLaunchModal(true)`	High

ID	Priority	Question	Answer from prototype	Evidence	Confidence
Q-36	P3	May card C-12 use the word "Incomplete" for bundles? Home asked whether reps see that word, and they do: the Products catalog card shows it.	Yes. Reps see "INCOMPLETE" and "Incomplete — needs a second item" on the Products catalog card.	workspace-app.jsx:33708 — `Incomplete — needs a second item`	High
Q-43	P3	On Individual Team stores, is the tab labelled "My Team" (not "My Team(s)")? If so, should the first row of the summary rail say "My Team" on those stores?	Yes. "My Team" on Individual Team stores ("My Teams" on League), and the rail matches.	workspace-app.jsx:1726; workspace-app.jsx:11202 — `label: isLeague ? "My Teams" : "My Team"`	High
Q-45	P3	What does the Reports row of the summary rail show, and where does "total raised" (fundraising) appear? The page says the Reports row is "a route, not a KPI strip" and that Home "may" show total raised, but doesn't say where. Is the "summary strip" in Epic A this same rail? And is it right that Settings has no row, given the rail is meant to be "a second route into each tab"?	The Reports row is a route ("Store analytics", no figure). Total raised is in the status strip above the columns, not the rail. There is no Settings row.	workspace-app.jsx:11205 — `sub: "Store analytics"`; workspace-app.jsx:11221 — `raised{lc.open ? " this window" : ""}`	High

Still open for requirement owners

- Q-1 (P1, Contradicts): pick added vs visible for the launch gate. The prototype uses added; Home's C-09/C-16 say visible.
- Q-2 (P1, Not in prototype): C-15 threshold, 14 or 7 days, and which page owns it.
- Q-3 (P1, Partial): give a within-tier rank list. The prototype only orders by colour and code order.
- Q-4 (P1, Partial): confirm which screens and edits feed "Recently worked on". The prototype shows sample rows only.
- Q-5 (P1, Partial): decide who adds the missing filtered views (store-wide incomplete players in My Team(s), unpaid-orders filter) and whether Home waits for them.
- Q-6 (P2, Partial): confirm Blocking tier on Draft stores and reword the definition. Also confirm the C-04 trigger (the prototype ignores fulfillment method).
- Q-7 (P2, Not in prototype): team-manager version of Home, yes or no.
- Q-9 (P2, Not in prototype): supply Appendix A or confirm the full amendment list.
- Q-11 (P2, Contradicts): remove C-17, or let Home read the seen flag. The prototype shows it on every Closed store.
- Q-12 (P2, Partial): routing for multi-record cards (C-02, C-11, C-12, C-13).
- Q-13 (P2, Partial): confirm C-03 is League + Ship to Team Manager only. The prototype skips the fulfillment-method check.
- Q-15 (P2, Not in prototype): whether league-wide products count for C-07.

- Q-16 (P2, Partial): define the per-row sizing-confirmed state or drop C-13.
- Q-17 (P2, Not in prototype): settle warn-and-orphan vs reassignment for C-27.
- Q-18 (P2, Partial): add "accept gap" to Settings or clear C-19 on close only.
- Q-19 (P2, Partial): define PO settled/open status and its owner.
- Q-20 (P2, Not in prototype): how a "kept" left-behind manager is stored.
- Q-21 (P2, Partial): correct the store-state card table.
- Q-22 (P2, Contradicts): approve "Point of Contact" for Settings and store creation. The prototype's Review step still says "Primary Contact".
- Q-23 (P2, Partial): where the main-contact designation is changed after creation. The prototype has no control.
- Q-25 (P2, Contradicts): edit logo and colours on Home or route to Settings. The prototype routes.
- Q-28 (P3, Partial): confirm whether the first-store onboarding tour is the Setup Guide. The prototype has both, separately.
- Q-31 (P3, Not in prototype): C-05 detail line content.
- Q-32 (P3, Not in prototype): C-07 button destination and wording.
- Q-33 (P3, Not in prototype): which render-pending products C-10 counts.
- Q-35 (P3, Partial): whether a failed re-decoration is Blocking.
- Q-37 (P3, Not in prototype): correct the C-27 copy.
- Q-38 (P3, Contradicts): confirm the store-level date and the 7-day boundary. The prototype's C-14 has no threshold.
- Q-39 (P3, Partial): C-18 start and clear rules. The prototype counts delivered orders too.
- Q-40 (P3, Not in prototype): which page owns the C-24 7-day threshold.
- Q-41 (P3, Partial): pick invite-status labels for Home rows. Settings uses "Active" / "Invited · not logged in"; Home shows none.
- Q-42 (P3, Partial): approve empty-state and trail copy. Draft and Closed empty states should name the lifecycle state.
- Q-44 (P3, Contradicts): whether the rail order count includes pending. The prototype includes it; the Orders tab's All Orders excludes it.
- Q-46 (P3, Partial): artwork-library link destination (Settings → Logo Library or none).
