Prototype Answers — Store Home (Home Tab)

Prototype: input/prototype/Team Stores/ (React JSX, single file `workspace-app.jsx`; no build, no backend, mock data) · Questions: 34 · Answered 4 · Partial 11 · Contradicts 5 · Not in prototype 14

All evidence paths are relative to `input/prototype/Team Stores/`. The Home tab is `HomeTab` (`workspace-app.jsx:11119-11404`). Its attention model is `buildHomeAttention` (`workspace-app.jsx:11027-11087`) and its callbacks are wired in `Dashboard` (`workspace-app.jsx:11511`). Home is read-only only when the store is archived (`workspace-app.jsx:28384` — `readOnly={!!activeStore.archived}`). `workspace-app-integrated.jsx` is a parallel copy (per the prototype's CLAUDE.md) and was not cited separately.

Screens found

- Workspace side-rail (embedded layout): Home, My Team(s), Products, Orders, Reports, Settings — `workspace-app.jsx:1716-1723` (`WORKSPACE_NAV`)
- Legacy tab strip (non-embedded layout): Home, Settings, Orders, Products, My Team(s), Reports — `workspace-app.jsx:11486-11492`
- Home tab — `workspace-app.jsx:11119` (`HomeTab`): status strip, Needs your attention, Recently worked on, League/Team Manager Information panel, In your store rail, League structure, Brand assets, setup-guide link
- Settings (General) — `workspace-app.jsx:18476` (`GeneralInfo`), sections store / distribution / schedule / customization
- Edit Store Details modal (holds Store Point of Contact) — `workspace-app.jsx:10611`
- Orders tab — `OrdersTabV2`; Pending Orders list — `workspace-app.jsx:23661`
- Team Manager access (invite statuses) — `workspace-app.jsx:31319` (`TMAccessSection`)
- Launch confirmation modal — `LaunchStoreModal`, opened from Home at `workspace-app.jsx:11511`

Answers

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-1	P1	Partial	The embedded workspace side-rail has six tabs in Home's order: Home, My Team(s), Products, Orders, Reports, Settings. The legacy tab strip uses a different order (Home, Settings, Orders, Products, My Team(s), Reports). Appendix A is not in the prototype. Open: which spec is authoritative, plus the Appendix A amendments.	workspace-app.jsx:1717-1722 — `{ id: "home", label: "Home" ... { id: "roster", label: "Roster" ... { id: "general", label: "Settings"`; workspace-app.jsx:11487-11492 — `{ id: "home", label: "Home", dot: false }, { id: "general", label: "Settings", ...`	Medium

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-2	P1	Contradicts	The prototype gates on products **added**, not visible. Both the launch gate and the Home C-09/C-16 cards count every product in the catalog, with no visibility filter. This matches Launch & Status Controls and Lifecycle but contradicts Home C-09 "zero visible products" and C-16 "≥1 visible product".	workspace-app.jsx:11449 — `const canLaunch = (store.products || []).length > 0;` ; workspace-app.jsx:11035-11038 — `if (((store.products || []).length) === 0) { cards.push({ tone: "red", ... title: "Add a product before you launch"` else `title: "Your store is ready to launch"`	High
Q-3	P1	Not in prototype	No C-21/C-22 (left-behind manager / portal access after re-bind) card exists. Home's attention model has no re-bind, previous-team or invite-based condition. Searched: buildHomeAttention, "portal access", "previous team", "re-bind", "kept". No match on Home.	—	—
Q-4	P2	Not in prototype	HomeTab has no role prop or role-based filtering. Its only gate is `readOnly`, which is set for archived stores. The prototype has no manager-role view of Home. Searched: role, manager-role, userRole on Home. The only role check is in the Close Report (`crUserId`, line 31794).	—	—
Q-5	P2	Contradicts	The close-report card (C-17) shows whenever the store is Closed. There is no per-user seen flag, so it never clears. It opens the Close Report as an overlay (event `closereport:open`), not a Reports tab entry. This contradicts Home C-17's trigger "has not seen the report" and its route "Reports → Store Close Report".	workspace-app.jsx:11075-11076 — `if (lc.closed) { cards.push({ tone: "grey", kind: "report", link: true, title: "Your close report is ready"` ; workspace-app.jsx:11141 — `else if (card.kind === "report") window.dispatchEvent(new CustomEvent("closereport:open", ...`	High

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-6	P2	Answered	C-03 ("needs a manager before their orders can ship") fires only on Open League stores, for divisions in "teams" mode with a team whose manager isn't complete. "Complete" requires name, valid email, valid phone **and an address**, so an assigned manager without an address also triggers it (option A). It routes to Settings → Distribution & Fulfillment with the first affected division/team focused. It never shows on Individual Team stores.	workspace-app.jsx:11044 — `if (lc.open && (store.storeType || "league") === "league" && org)` ; workspace-app.jsx:11048 — `filter(function (r) { return !managerComplete((org.managers || {})[r.id]); })` ; workspace-app.jsx:13235 — `return !!(hasName && isValidEmail(m.email) && isValidPhone(m.phone) && String(m.address || "").trim());` ; workspace-app.jsx:11417 — `setManagerFocus({ groupId, rosterId, n: Date.now() }); setSettingsSection("distribution"); setTab("general");`	High
Q-7	P2	Not in prototype	No C-05/C-15 (players with un-ordered Team Required gear) card on Home, so no route is defined. Searched: "Team Required", incomplete, un-ordered in buildHomeAttention. No match.	—	—
Q-8	P2	Not in prototype	Same as Q-7: C-05 is not implemented. Searched: "Team Required", committed, captures in buildHomeAttention. No match.	—	—
Q-9	P2	Partial	Only two catalog conditions exist: zero products (C-09, Draft) and image/render failed (C-11, Open stores only). C-10, C-12, C-13 and C-27 are not implemented. Open: v1 scope and the Products-tab filter audit.	workspace-app.jsx:11035-11036 — `cards.push({ tone: "red", navTab: "products", kind: "products", title: "Add a product before you launch"` ; workspace-app.jsx:11060-11063 — `const failed = homeFailedProducts(store); if (lc.open && failed.length) { ... title: ... "Images failed for "`	High
Q-10	P2	Not in prototype	No C-15 card. The only close-date card (C-14) shows for every Open store with a close date, with no 7- or 14-day threshold. Searched: 14, 7 days, threshold in buildHomeAttention. Only `if (lc.open && close)` at line 11079.	—	—

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-11	P2	Not in prototype	No C-20 (unsettled payment / open PO) card. Searched: PO, unsettled, settle on Home. No match.	—	—
Q-12	P2	Not in prototype	C-21/C-22 are not implemented, so no "kept" state is recorded. Searched: kept, keep, re-bind on Home and in the manager records. No match.	—	—
Q-13	P2	Not in prototype	No C-24 (invite not activated) card on Home. Settings shows the "Invited · not logged in" status with no age threshold (line 31371). Searched: 7-day, threshold, lastLogin in buildHomeAttention. No match.	—	—
Q-14	P2	Partial	Cards are sorted by tier only (red, blue, grey). Within a tier the order is the hard-coded push order: Draft = products/launch, then address; otherwise assign managers, failed images, pending orders, Roster Bank, close report, orders being made, schedule. There is no per-condition rank column. Open: the intended cost-of-delay ranks.	workspace-app.jsx:11084-11085 — `const rank = { red: 0, blue: 1, grey: 2 }; cards.sort(function (a, b) { return rank[a.tone] - rank[b.tone]; });`; workspace-app.jsx:11148 — `const visible = showAll ? cards : cards.slice(0, 5);`	High
Q-15	P2	Partial	The prototype gates its 9 implemented conditions by state. Archived = none. Draft = C-09 or C-16, plus C-04. Open = C-03, C-11, C-14, Roster Bank, plus pending orders. Closed = close report, orders being made, plus pending orders. C-03 is League-only. It does not cover the other ~16 catalogue conditions, so the full matrix and the 24 vs 25 count stay open.	workspace-app.jsx:11033-11034 — `if (!lc.archived) { if (lc.draft) {`; workspace-app.jsx:11067 — `if (oi.pending > 0) {` (no state check); workspace-app.jsx:11070 — `if (lc.open && bank.total > 0) {`; workspace-app.jsx:11075 — `if (lc.closed) {`	High

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-16	P2	Not in prototype	The resume trail is a hard-coded mock array of display strings (line 11180), with no stored event, identifier or composition. Searched: resume, event, label in HomeTab. Only mock rows.	—	—
Q-17	P2	Not in prototype	There is no opt-in write path. The trail is three fixed mock rows per store type, shown only on seeded non-Draft stores (line 11180). One mock row is a bulk event, "Imported 4 players". Searched: resume, trail, opt-in.	—	—
Q-18	P2	Partial	8e: Home uses the "Point of Contact" label, and Settings uses "Store Point of Contact". The setup wizard summary still says "Primary Contact". 8d: Brand assets (Team Logo, Team Colors, Theme Color) stay editable after launch and only Archived locks them. 8b: There is no "Add from Team Database" action on the Home manager panel. Open: whether the Settings amendments land first.	workspace-app.jsx:11280 — `{m.poc && <span ...>Point of Contact</span>}` ; workspace-app.jsx:10019 — `>Primary Contact</span>}` ; workspace-app.jsx:11357 — `{/* Brand assets — editable after launch; only Archived locks it. */}` ; workspace-app.jsx:11366 — `{!readOnly && <HomeLinkBtn label="Edit ›" onClick={function () { onGoSettings("store"); }} />}`	Medium
Q-19	P2	Contradicts	The designation is **not** in a manager modal. It sits in Store Details as "Store Point of Contact", with a comment saying it moved out of the manager modal. But Home never opens a shared manager modal: "Add manager" and a non-POC row's "Edit ›" jump to Settings → Distribution, and the POC row's "Edit ›" goes to Settings → Store. This contradicts Home p32 "Home opening the full shared modal".	workspace-app.jsx:10806 — `{/* Store Point of Contact — moved here from the manager modal */}` ; workspace-app.jsx:11272 — `<button onClick={function () { onManagers(null); }} ...>Add manager</button>` ; workspace-app.jsx:11287 — `<HomeLinkBtn label="Edit ›" onClick={function () { m.poc ? onGoSettings("store") : onManagers(null); }} />`	High

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-20	P3	Answered	On Draft, both the zero-products card (C-09) and the missing-delivery-address card (C-04) use the red (Blocking) rail with a dark primary button (option A).	workspace-app.jsx:11036 — `cards.push({ tone: "red", navTab: "products", kind: "products", title: "Add a product before you launch"` ; workspace-app.jsx:11041 — `cards.push({ tone: "red", navTab: "general", kind: "settings-store", title: "Add a delivery address before orders can ship"` ; workspace-app.jsx:11111 — `background: card.tone === "red" ? "#0e0e10" : "#fff"`	High
Q-21	P3	Contradicts	Home's status strip echoes the lifecycle pill and shows Closed in **amber**, with a comment calling it "the one place amber is allowed". This contradicts AC p42 "no amber is used anywhere on Home". Home shows no invite statuses.	workspace-app.jsx:11213 — `{/* Status strip — the one place amber is allowed (canonical Closed pill). */}` ; workspace-app.jsx:11152 — `: lc.closed ? { label: "Closed", bg: "#fdf3d3", color: "#8a6408", dot: "#d9a514" }`	High
Q-22	P3	Answered	Blocking (red) only. A tab gets a dot only when a red card has a `navTab`. Blue (Action) cards, the launch card (header) and grey cards never set a dot.	workspace-app.jsx:11088-11091 — `// Red dot on a nav tab only when a red-rail card resolves to it.` / `if (c.tone === "red" && c.navTab) s.add(c.navTab);` ; workspace-app.jsx:11038 — `cards.push({ tone: "blue", kind: "launch", ...` (no navTab)	High
Q-23	P3	Not in prototype	No C-02 (group below MOQ) card on Home. Searched: MOQ, minimum, below in buildHomeAttention. No match. MOQ appears only in the Orders tab.	—	—
Q-24	P3	Partial	C-04 fires when the store's ship street is empty or whitespace, and only on Draft stores. It clears when any non-empty street is entered, with no verification. Pick-up locations switched off at workspace level aren't modelled. Open: the verified vs non-empty rule, the switched-off location case, and whether C-04 should also hold after launch.	workspace-app.jsx:11040-11041 — `if (!String(store.shipStreet || "").trim()) { cards.push({ tone: "red", navTab: "general", kind: "settings-store"` (inside `if (lc.draft)`)	High

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-25	P3	Partial	The Orders tab describes Pending as "Awaiting MOQ & submission" (no "approve"), but rep-facing Orders text still says "Containers are keyed to a division or team". Open: whether to replace "container" with "group" in rep-facing Orders copy.	workspace-app.jsx:24634 — `{ id: "pending", label: "Pending Orders", desc: "Awaiting MOQ & submission", ...`; workspace-app.jsx:23705 — `Containers are keyed to a division or team.`	Medium
Q-26	P3	Contradicts	Both buttons only route. "Launch store" opens the existing launch confirmation modal (option A). "Retry" on the failed-images card goes to the Products **tab**, not the affected product's detail page as C-11 specifies.	workspace-app.jsx:11134 — `if (card.kind === "products") onGoTab("products");`; workspace-app.jsx:11065 — `action: "Retry" });` ; workspace-app.jsx:11511 — `onLaunch={() => {if ((store.products || []).length) setShowLaunchModal(true);}}`	High
Q-27	P3	Partial	"Still being made" counts every submitted order (My Orders + Fan Orders) on a Closed store, with no shipped/delivered filter, so the prototype card never clears. Open: Shipped vs Delivered.	workspace-app.jsx:10991 — `const submitted = (data.myOrders || []).length + (data.fanOrders || []).length;`; workspace-app.jsx:11077 — `if (oi.submitted > 0) cards.push({ tone: "grey", kind: "orders", ... " still being made"`	Medium
Q-28	P3	Not in prototype	No C-19 coverage-gap card on Home. Settings shows a coverage-gap notice (line 18358) with no accept action. Searched: gap, accept in buildHomeAttention. No match.	—	—
Q-29	P3	Partial	Ages are hard-coded strings, not read from any service: pending-orders card "Oldest placed 3 days ago", Roster Bank card "Oldest captured 2 days ago". C-05 isn't implemented, so it has no age and no contact-less count. Open: C-05 copy and the owning source for ages.	workspace-app.jsx:11068 — `detail: "Oldest placed 3 days ago — orders reach the factory after you submit"` ; workspace-app.jsx:11072 — `"Oldest captured 2 days ago — banked from storefront orders, not yet on a roster"`	Low

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-30	P3	Answered	No Settings row. The rows are My Team(s), Products, Orders and Reports, in nav order. The Orders row shows pending + submitted as "n orders", with "n to submit" appended. Total raised appears in the status strip, not the rail. The first row's label follows the live nav label ("My Teams" on League, "My Team" on Individual), not a literal "My Team(s)".	workspace-app.jsx:11201-11205 — `{ id: "roster", label: isLeague ? "My Teams" : "My Team", ...` / `{ id: "orders", label: "Orders", sub: (oi.total) + " orders", extra: oi.pending ? { text: oi.pending + " to submit"` / `{ id: "payouts", label: "Reports", sub: "Store analytics" }`; workspace-app.jsx:10992 — `return { pending, submitted, total: pending + submitted, pendingGroups };` ; workspace-app.jsx:11221 — `{fmtMoney(raised)} </strong> raised`	High
Q-31	P3	Partial	The Home panel shows no invite status at all, only email, phone and contact preference. "Invite" routes to Settings (store section) without sending anything. The footnote names "Settings → People & Access". The Settings access list uses "Invited · not logged in". Open: whether Home should show status, and with which labels.	workspace-app.jsx:11286 — `{!m.poc && <HomeLinkBtn label="Invite" onClick={function () { onGoSettings("store"); }} />}` ; workspace-app.jsx:11282 — `{[m.email, m.phone, m.pref].filter(Boolean).join(" · ") || "No contact details yet"}`; workspace-app.jsx:31371 — `Invited · not logged in`	High
Q-32	P3	Partial	Present: the empty state (state-aware), the archived state, "n more", resume rows "Open ›", and the no-portal-access footnote. Missing: removal on Home, the blocked-removal reason and the removal confirmation (Home has no remove action), and a "who buyers see" note (only the "Point of Contact" tag).	workspace-app.jsx:11243 — `"This store is archived and read-only — nothing is awaiting action." : lc.open ? "Nothing needs your attention right now. The store is open and taking orders." : "Nothing needs your attention right now."` ; workspace-app.jsx:11239 — `{hiddenCount} more` ; workspace-app.jsx:11293 — `Adding a manager creates a contact record only — it does not grant portal access.`	High
Q-33	P3	Not in prototype	No C-12 card. No rep-facing "Incomplete" product label was found in the Products tab. The only hit is a code comment about bundles (line 12887). Searched: "Incomplete", incomplete.	—	—

ID	Priority	Status	Answer from prototype	Evidence (file:line — quoted code)	Confidence
Q-34	P3	Not in prototype	The prototype resolves all cards synchronously from mock data, with no progressive loading or latency budget. Searched: loading, skeleton, placeholder in HomeTab. No match.	—	—

Answered — no need to ask the US team

4 question(s) the prototype settles. Remove these from the list sent to the requirement owners.

ID	Priority	Question	Answer from prototype	Evidence	Confidence
Q-6	P2	Which condition covers the freight-gate blocker "missing destination address on an assigned manager"? Where does C-03 route, and can C-03 hold on Individual Team stores?	C-03 treats a manager as missing unless name, email, phone **and address** are complete, which covers assigned-without-address (option A). It routes to Settings → Distribution & Fulfillment with the division/team focused, and fires only on Open League stores (never Individual).	workspace-app.jsx:11044, 11048, 13235 — `String(m.address || "").trim();` workspace-app.jsx:11417 — `setSettingsSection("distribution")`	High
Q-20	P3	How do C-04 and C-09 meet the Blocking definition on Draft stores, where no buyers or orders exist?	Both are red (Blocking) rail with a primary button on Draft (option A).	workspace-app.jsx:11036, 11041 — `tone: "red"`	High
Q-22	P3	Do Action-tier conditions put a dot on their tab, and do conditions that resolve to the header (C-16) or Reports put a dot anywhere?	Blocking only. Blue, grey and header-routed cards produce no dot.	workspace-app.jsx:11091 — `if (c.tone === "red" && c.navTab) s.add(c.navTab);`	High

ID	Priority	Question	Answer from prototype	Evidence	Confidence
Q-30	P3	Summary rail: does Settings get a row, which order count is the headline, is "total raised" in scope, and what label does the first row use on Individual Team stores ("My Team" vs "My Team(s)")?	No Settings row. Orders = pending + submitted, with "n to submit". Total raised is in the status strip. The label mirrors the live tab: "My Teams" on League, "My Team" on Individual.	workspace-app.jsx:11201-11205; workspace-app.jsx:11221 — `raised`	High

Still open for requirement owners

- Q-1 (Partial): Confirm the authoritative tab order (the prototype has two different orders in its two layouts) and supply Appendix A.
- Q-2 (Contradicts, P1): The prototype gates launch, C-09 and C-16 on products **added**, but Home says "visible". Pick one.
- Q-3 (Not in prototype, P1): Decide the C-22 trigger after a manager record is removed.
- Q-4 (Not in prototype): Decide Home visibility and the condition set for manager-role users. Confirm the Portal "no".
- Q-5 (Contradicts): The prototype shows C-17 for the whole Closed period (no seen flag) and opens the report as an overlay. Decide the trigger and the route.
- Q-7 (Not in prototype): Decide the C-05/C-15 route target.
- Q-8 (Not in prototype): Decide whether C-05 counts committed records only, and its Closed-store scope.
- Q-9 (Partial): Decide v1 scope for C-10, C-12, C-13 and C-27 (only C-09 and C-11 are prototyped).
- Q-10 (Not in prototype): Decide the C-15 threshold (7 or 14 days) and its owner.
- Q-11 (Not in prototype): Decide C-20's tier, scope and PO settlement owner.
- Q-12 (Not in prototype): Decide how "kept" is recorded for C-21/C-22.
- Q-13 (Not in prototype): Decide the owner of the C-24 7-day threshold.
- Q-14 (Partial): Supply within-tier ranks (the prototype uses its hard-coded build order).
- Q-15 (Partial): Supply the full condition × state × store-type matrix and fix the 24/25 count.
- Q-16 (Not in prototype): Decide whether the resume label is stored or composed.
- Q-17 (Not in prototype): Supply the resume-trail opt-in table.
- Q-18 (Partial): Decide whether the Settings 8b, 8d and 8e amendments gate Home. The prototype already uses "Point of Contact" on Home and leaves brand assets editable until Archived.
- Q-19 (Contradicts): The prototype keeps the designation out of the manager modal, but Home's "Add manager" and "Edit ›" route to Settings instead of opening the shared add/edit/remove-manager modal. Pick one.
- Q-21 (Contradicts): The prototype echoes the Closed pill in amber on Home. Decide whether to keep it or neutralise it to meet "no amber anywhere".
- Q-23 (Not in prototype): Decide C-02's multi-group copy and scroll target.
- Q-24 (Partial): Decide the verified vs non-empty clear rule, the switched-off location case, and whether C-04 holds after launch.
- Q-25 (Partial): Decide whether rep-facing "container" in Orders becomes "group".

- Q-26 (Contradicts): C-11 "Retry" goes to the Products tab, not the product detail page. Confirm the target.
- Q-27 (Partial): Decide Shipped vs Delivered for C-18.
- Q-28 (Not in prototype): Decide what "accepted" means for C-19.
- Q-29 (Partial): Decide C-05's age copy and the owning source for "oldest" ages (hard-coded in the prototype).
- Q-31 (Partial): Decide whether Home shows invite status, and with which labels.
- Q-32 (Partial): Supply copy for the blocked-removal reason, the removal confirmation and the "who buyers see" note.
- Q-33 (Not in prototype): Confirm whether "Incomplete" is rep-facing on the Products tab.
- Q-34 (Not in prototype): Set the resolver latency budget, the large-store size and the progressive-render rule.
